FORTY-FIRST REPORT

TO THE

LEGISLATURE OF MASSACHUSETTS

RELATING TO THE

Registry and Return

OF

BIRTHS, MARRIAGES, AND DEATHS

IN THE

COMMONWEALTH,

FOR THE YEAR ENDING DECEMBER 31, 1882,

TOGETHER WITH THE REPORT RELATING TO THE RETURNS OF

LIBELS FOR DIVORCE

FOR THE YEARS 1879 TO 1882, INCLUSIVE.

PREPARED UNDER DIRECTION OF THE
SECRETARY OF THE COMMONWEALTH.

WITH EDITORIAL REMARKS BY
FRANK WELLS, M. D.

BOSTON :

WRIGHT & POTTER PRINTING CO., STATE PRINTERS, 18 POST OFFICE SQUARE.

1883.

Commonwealth of Massachusetts.

SECRETARY'S DEPARTMENT, BOSTON, Oct. 15, 1883.

To the Honorable Senate and House of Representatives.

In conformity with the provisions of the fifteenth section of the thirty-second chapter of the Public Statutes, I have the honor to submit herewith the Forty-first Annual Registration Report, relating to the Births, Marriages, and Deaths occurring in the Commonwealth during the year 1882, and registered in and returned from the several cities and towns, together with the Report relating to the returns of Libels for Divorce in each county, for the years 1879 to 1882 inclusive, in accordance with the requirements of chapter 194 of the Acts of 1882.

The editorial remarks constituting the preliminary portion of the present report have been prepared by Dr. Frank Wells, formerly health officer of Cleveland, Ohio, author of several treatises on Sanitary Science, and well known for his investigations in the field of Vital Statistics.

From the abstracts of the returns of Divorces for the four years 1879-82, and from the Statistics of Divorces, given in the Eleventh Annual Report of the Bureau of Statistics of Labor, full and exhaustive tabular statements relating to divorces granted during the last twenty years, have been made by the editor, and appear in the editorial.

Respectfully submitted,

HENRY B. PEIRCE,

Secretary of the Commonwealth.

LAW relating to Returns of Libels for Divorce (Laws of 1882, chap. 194),	ccxiii
CLASSIFICATION OF DISEASES, as adopted in the Registration of Massachusetts,	ccxiv

FORTY-FIRST REGISTRATION REPORT.

(1882.)

The estimated population for 1882, calculated from the number of assessed polls of that year (482,844) was 1,921,719.

In the year 1882, there were recorded 45,670 births, 17,684 marriages and 36,785 deaths; or 450 more births, 916 more marriages and 327 more deaths than in the preceding year.

The excess of living births over deaths was 8,885, which is 40 less than the same increase in 1880, but 123 more than in 1881.

The approximate rates for the year are : —

Births,	.	.	.	23·76	to	1,000	of	estimated	population.
Marriages,	.	.	.	9·20	“	“	“	“	“
Deaths,	.	.	.	19·14	“	“	“	“	“
Excess of births over									
deaths,	.	.	.	4·62	“	“	“	“	“

This would indicate one child born alive to every 42 persons, one married to every 54, and one death in every 52 living.

Table 1 shows the number of births, marriages and deaths, and the variations in rates for a period of years.

The excess of our birth-rate over the death-rate in 1882 (4·62) was 3·16 lower than the average for the thirty years from 1850 to 1880, reckoned from census to census; and very far below the average of most of the leading European nations, though above that of Hungary and France.

NOTE. — Norwood was incorporated from Dedham and Walpole; and Holbrook was separated from Randolph February, 1872.

Charlestown, West Roxbury, and Brighton were added to Boston January, 1874. North Bridgewater was changed to Brockton and Rockland was incorporated from Abington March, 1874.

South Abington was incorporated March, 1875, from Abington, except a small portion from East Bridgewater.

Merrimac was incorporated April, 1876, from Amesbury.

Hampden was separated from Wilbraham March, 1878. North Adams was separated from Adams, April, 1878.

Cottage City was separated from Edgartown, 1880.

The present names of the cities and towns are used in the table.

There has been no change of county, except that Brighton and Charlestown from Middlesex, and West Roxbury from Norfolk, were added to Suffolk County. In the three years of separate existence, there were in Charlestown 2,503 births, 1,146 marriages, 2,191 deaths — average age at death, 24-75; in Brighton, 514 births, 147 marriages, 318 deaths — average age at death, 27-83; in West Roxbury, 807 births, 180 marriages, 410 deaths — average age at death, 28-92. These three towns are included for 1871, 1872, and 1873 with Boston, and also in the figures for Suffolk County on page 17. On pages 12 and 14, the county figures of Middlesex and Norfolk exclude the three towns.

There were 3,196 births and 4,829 deaths in the workhouse and almshouses of the State included in the statistics of the State, but not assigned to their several counties or towns.

BIRTHS.

By a reference to Tables 5 and 6, it will be seen that, although the number of births in 1882 has not once been equalled in a period of twenty years, yet the rate for living births (23·76) is lower, with but two exceptions (1857 and 1879), than in any year since 1850, and below all the quinquennial averages for the same period.

TABLE 5. — *Births for Twenty Years.*

YEARS.	Born alive.	Still-born.	Total.	YEARS.	Born alive.	Still-born.	Total.
1863, .	30,314	903	31,217	1873, .	44,481	1,246	45,727
1864, .	30,449	856	31,305	1874, .	45,631	1,469	47,100
1865, .	30,249	859	31,108	1875, .	43,996	1,374	45,370
1866, .	34,085	1,046	35,131	1876, .	42,149	1,274	43,323
1867, .	35,062	1,007	36,069	1877, .	41,850	1,254	43,104
1868, .	36,193	1,050	37,243	1878, .	41,238	1,261	42,499
1869, .	36,141	1,094	37,235	1879, .	40,295	1,261	41,556
1870, .	38,259	1,019	39,278	1880, .	44,217	1,297	45,514
1871, .	39,791	1,390	41,181	1881, .	45,220	1,466	46,686
1872, .	43,235	1,283	44,518	1882, .	45,670	1,485	47,155

The rate for 1882, including still-births, is 24·53 ; or ·77 for still-births alone.

1881, 24.21.*

The fluctuations in the birth-rates of the counties, for a series of years, indicate the effect of those causes which influence the material growth of communities. In those counties, in which are concentrated the densest populations, and the greatest number of foreigners, the birth-rate is found to have increased; whereas those counties, which contain the more sparsely settled districts, the largest native population, and from which the young are prone to emigrate, show a diminishing rate.

This may also be seen in Table 8, in which are shown, by cities and towns, the birth-rates, as affected by the above conditions.

* Estimated.

Seasons. — In 1882, as in 1881, the highest birth-rate was in August, and in the third¹ quarter. The lowest rate in 1882 was in February, although in the second quarter, as compared with February and the first quarter, in 1881. These differences are however but slight.

* Excluding births at State Almshouse.

Calculated for fifteen years, the quarterly rates were in the following order:—3d quarter, 26.73; 4th quarter, 26.47; 1st quarter, 23.44; 2d quarter, 23.36. 46.80 per cent. of the births occurred in the first half of the year, and 53.20 per cent. in the last half. The highest average number of births took place in August. The order of the other months was October, December, September, November, July, March, June, May, January, April, February.

For a period of twenty-nine years, the proportion of males to 100 females born alive was 105·7, a ratio which varies but little from year to year. This excess is much more marked among the still born (147·7 males to every 100 females), since, owing to the larger size of the male, its successful birth is more frequently imperilled. On the contrary, the females of illegitimate birth exceeded the males, in the above period, in the proportion of 100 to 98·7, which is a disproportion not susceptible of ready explanation.

* Including 357 in which the month was not reported.

Table 12 shows that the proportion of male to female births, is quite uniform, particularly for the State at large. The number of births in 1882, in which the sex was not recorded, was 97, as compared with 137 in 1881. Of the former, 10 were in Berkshire; 6 in Bristol; 1 in Dukes and Nantucket; 36 in Essex; 3 in Hampden; 15 in Middlesex; 5 in Norfolk; 2 in Plymouth; 1 in Suffolk; 18 in Worcester.

It is worthy of remark that in 1882 there were 553 more children born of native parents than of foreign, an increase of 504 over the excess in 1881, and 602 over that in 1880. The number with mixed parentage was 7,612 in 1882, as compared with 7,386 in 1881 and 7,185 in 1880. In Dukes and Nantucket the proportion of native births was 22·5 to one of foreign; in Barnstable, 5·85 to one; in Plymouth, 3·54; in Franklin, 1·96; in Norfolk, 1·55; in Hampshire, 1·53; in Berkshire, 1·51; in Essex, 1·35 to one.

In Dukes and Nantucket there were 13·5 more births of native parentage, to one of foreign, than in the previous year, and in Barnstable, 1·35 more; in Plymouth there were ·71 to one fewer.

The births of foreign parentage exceeded those of natives in the following counties and ratios: — Suffolk, 1·42 to one; Bristol, 1·19; Worcester, 1·14; Hampden, 1·06; Middlesex, 1·06 to one.

In the last eleven years (see Table 14) the percentage of native births has slightly increased, while that of foreign births has more strikingly diminished, the difference between them showing a marked tendency to gradual obliteration. In the same period, the percentage of births of mixed parentage has increased 6·23 per cent.

Table 15 shows that since 1859 (thirty-three years) there has been a decrease of 21·40 per cent. in our native births; while the foreign births, although they have increased 5·55 per cent. in the above period, have nevertheless decreased 6·97 per cent. since 1871, at which time they seem to have reached their height.

Plural Births. — In 1882, 422 women gave birth to 849 living children, including 834 cases of twins and 5 of triplets. The excess of those born among the foreign population over the native-born (1·3 pr cent) was much less than in the previous eighteen years; while the percentage of those with mixed parentage was the highest for the same period. Table 13 shows the numbers and parentages, by counties; Tables 17 and 18, the variations for a period of years.

Illegitimate Births. — Table 19 shows that the proportion of children, born out of wedlock, to every thousand births was greater in 1882 than ever before recorded in the State. This ratio has increased 9·1 per cent. since 1863, thus showing a marked growth in the number of illegitimate children.

Of the mothers of illegitimate offspring, the percentage of natives, for a period of years, was largely in excess of those of foreign birth, although this excess was much less in 1882 than in 1881. Of the 865 illegitimate births, 457 were males, 406 females, and in two the sex was not recorded. Suffolk County furnished 50·75 per cent. of the entire number.

Still-born. — There were 1,485 still-births reported, of which 807 were males, 602 females, and 76 in which the sex was not recorded.

MARRIAGES.

Seventeen thousand six hundred and eighty-four (17,684) marriages took place in 1882, which was but a slight increase over the previous year. The approximate marriage rate was 18·40, or 9·20 marriages to 1,000 of the estimated population, indicating one person married in each 54. The rate was 1·07 per cent. higher than the average for the previous seven years, but ·78 per cent. lower than that since 1855.

County Marriage Rates. — In Barnstable County, the number of marriages was the lowest, with but one exception (1880), since 1873. In Barnstable, Berkshire, Franklin, Hampshire and Norfolk, there were fewer marriages than in 1881; while Bristol showed the greatest increase over the previous year.

Table 23 shows the marriage-rates, as affected by the density of population. The average rate for the sixteen cities, for the four census years, was 2.73 per cent. higher than that for the rest of the State; a preponderance also existing in favor of the larger over the smaller towns. These differences are but expressions of the well established fact, that the rates of marriage are, for reasons which are obvious, invariably higher in densely populated cities and towns than in the more sparsely settled country districts.

Due allowance must be made, in the statistics of marriage, for inaccuracies; since there is ample reason for believing that more or less carelessness exists in making the proper returns to the town clerks.

Seasons. — The largest number of marriages in 1882 took place in November, and in the fourth quarter of the year; the smallest number in March and in the first quarter, thereby following the usual rule. In thirteen marriages the month was not recorded.

1882, . . .	29·2	25·4	26·5	23·9

The average ages at marriage, in Tables 26 and 27, are calculated from the means of each five years period of life — that is, from the assumption that all under 20 are $17\frac{1}{2}$ years old, that all between 20 and 25 are $22\frac{1}{2}$, and so on.

In 1882, there were 781 more first marriages; and 139 more second marriages than in the previous year.

Fourteen thousand one hundred and eighty-two bachelors married maids, and 795 married widows; 1,774 widowers married maids, and 845 married widows. There were 2,689 widowers married, and 1,710 widows.

Thirty-seven and nine-tenths (37·9) per cent. of the males were married between the ages of 20 and 25; 30·8 per cent. between 25 and 30; 13·3 per cent. between 30 and 35. In ten marriages of males the ages were not reported.

Forty-five and nine-tenths (45·9) per cent. of the females were married between 20 and 25 years of age; 21·3 per cent. between 25 and 30; 16·8 per cent. under 20; 7·5 per cent. between 30 and 35. There were twenty females married, whose ages were not recorded.

Six hundred and seventy-nine men and 206 women were married over 50 years old; 19 men and one woman over 75, and three men over 80.

DEATHS.

Thirty-six thousand seven hundred and eighty-five (36,785) deaths were registered in 1882, an increase of but 327 over the mortality of the preceding year, and 1,493 over that of 1880.

The death-rate per 1,000 of the living population (19·14) was ·38 per cent. less than the rate in 1881, which in turn was ·27 per cent. lower than that for 1880; ·08 per cent. less than the average for the five years, and ·22 per cent. lower than the average for the thirty years, previous to 1881. It was exceeded only twelve times in a period of thirty-one years.

The mortality is always increased by the death of children under the age of five. In 1882, the percentage of deaths, at this period of life, was the lowest since 1872, and 3·83 per cent. less than the average for the eleven years. With the decline also in the number of deaths from the zymotic diseases, none of them having prevailed as serious epidemics, the year must be considered as one of above the average health.

In the following, as well as in the preceding tables, the population is estimated, except in the census years.

Thirty years' average,								—	19.26	19.26

The death-rate by counties, as shown in Table 35, is tolerably uniform from year to year. In Berkshire, Franklin, Hampshire, Middlesex, and Plymouth, fewer deaths occurred in 1882 than in the previous year, the most striking decrease being in Hampshire. The greatest increase was in Bristol.

Of the geographical districts (Table 36), the Western shows the lowest average death-rate for the last four census years, and the Metropolitan the highest. In 1882, however, the largest number of deaths occurred in the North-eastern district; in the Metropolitan, Valley, and Western districts, there was a smaller mortality than in the preceding year.

* Chelsea, Revere, and Winthrop, of Suffolk County, are in the *North-eastern Division*. Ashby, Townsend, Pepperell, Shirley, Groton, Dunstable, Tyngsborough, Westford, Littleton, Roxborough, Acton, Stow, Marlborough, and Hopkinton, of Middlesex County, are in the *Midland Division*; the rest of Middlesex County is in the *North-eastern Division*.

For manifest reasons, the death-rate in the cities is always higher than in the towns of smaller populations. This, as has been shown, is true also of the births and marriages; the difference in their rates, as affected by the density of population, particularly in the case of the former, closely corresponding in a series of years to the variations noted in the mortality.

Sex. — Fifty-eight more females died in 1882 than males — the smallest difference, with but three exceptions (1867, 1871, 1874) since 1852. In seven deaths the sex was not reported.

The proportion of male deaths to 100 deaths of females was 99·6, — that is for every hundred females dying, there were 99·6 males. This excess in the mortality of females is more apparent than real, since by the census of 1880 there were 107·7 females living to every 100 males (858,440 males; 924,645 females); and, therefore, the male death-rate, as compared with that of the female, should be placed relatively higher. The same of course is true of the excess of the male death-rate (1·2 per 1,000) for the five census years.

Table 41 shows that 778 more males than females died under the age of five ; or 163 less than the excess in 1881, and $\cdot 77$ per cent. less than the average for eleven years. Above the age of twenty, and particularly between twenty and thirty, the mortality of females predominated over that of males, as was the rule for the previous ten years. 20·22 per cent., or about one-fifth of the total mortality, occurred under one year, and 31·23 per cent., or not quite one-third, under five, — a proportion, which is verified by the statistics of a period of years.

In Table 42, the ratio of infant mortality under one year was but $\cdot 03$ of one per cent. higher than the average for eleven years ; while that of infants and young children under five was much lower than this average.

TABLE 42. — *Deaths at Different Ages. — Percentages. — Eleven Years.*

	Under 1 Year.	Under 5 Years.	20 to 30.	All others.
1872,	23·96	38·75	10·76	50·49

* Dukes, 46·64; Nantucket, 52·28.

The average age at death in 1882, as shown in Table 46, was higher for the whole State and for all the counties than the average for thirty years, the most marked increase being in Norfolk. In Dukes and Nantucket, Franklin, Essex, and Hampden it was less than in the preceding year.

It is doubtful, however, whether such statistics furnish a very correct knowledge of the relative healthfulness of the various districts, since other factors, such as emigration and immigration, etc., must be taken into consideration before a fair result can be obtained.

The number of centenarians who died in 1882 was unusually large. Although a natural doubt is created, as to the accuracy of the recorded ages, yet there can be no question but that a remarkably large number of persons died at an advanced age.

* Including those whose nativity was not recorded. In the calculations of percentages, the totals are not given to the *total* reported deaths, but only to the total of those cases where the nativity was stated.

CAUSES OF DEATH.

Of the 36,785 deaths which were registered in 1882, in 590 only, or 1·60 per cent., was there a failure to return the causes, as compared with 665 and 1·82 per cent. in 1881, and 1,290 and 4·61 per cent. in 1871. That is, there were 36,195 deaths, in which all the facts required by law were reported — a gratifying result, when the many difficulties attendant upon accuracy are considered.

Of the 590 unspecified causes of death, 102 were from hemorrhage, 50 from tumor, 23 from inflammation, and 415 in which no cause was stated in the returns.

The causes of death by classes, and a comparison with the previous year are shown in Table 50. It will be seen that they all indicate an increase, more or less marked, over the statistics of 1881, with the exception of the zymotic, in which there is a decrease.

TABLE 50. — *Causes of Death by Classes, 1881–1882.*

* Excluding 1,466 still-born.

† Excluding 1,485 still-born.

In the deaths from the *zymotic diseases* (Table 51), the ratio for 1882 was 4·4 per cent. less than the average for eleven years, and 1·2 per cent. less than in 1881. That of the constitutional class was very near the average, and nearly equal also to the percentage of the preceding year. From the local diseases the ratio of mortality was only ·5 per cent. higher than in 1881, but 5·3 per cent. above the eleven years average. The developmental class showed a percentage ·6 higher than in the previous year, but ·8 lower than the average since 1872. Violent deaths were ·4 per cent. higher than in 1881, and ·1 per cent. only over the average.

* Excluding deaths from unspecified causes and still-births.

Table 52 shows the mortality from the nine most destructive zymotic diseases, during a period of eleven years. As a whole these diseases were less fatal in 1882 than in any year during the above period, with the exception of 1879.

The number of deaths from typhoid fever, the type of the so-called “ filth-diseases,” shows a marked advance since 1875, up to which year there was even a more striking decline from 1872.

The mortality from diphtheria, one of the most dreaded and fatal diseases, was much lower than for the six years preceding — a decline, however, which is not proportionate to its rapid increase from 1872 to 1875.

From croup, which many facts seem to prove should be classed with diphtheria, as identical with it, there were fewer deaths than in any year of the previous decade, with the exception of the first three years of it, — the mortality of these years, however, showing but a slight decrease.

Scarlatina caused the smallest number of deaths in the eleven years, the decrease since 1876 being very marked. In measles also there was a striking decline in fatality.

The mortality from cholera infantum has not been exceeded since 1875, although below the average for eleven years.

The number of deaths from small-pox was strikingly less than in 1872, but nearly twice as large as in 1874, from which year there was an increase to 1876, followed by a marked decline to 1880, with a subsequent gradual increase.

There were but 52 and 50 deaths more, respectively, from dysentery and whooping cough than for the average of the eleven years period.

Of the *constitutional class*, the two most prominent diseases, — consumption and cancer, — are referred to at length in subsequent tables.

Of the *local diseases*, those affecting the brain and nervous system have made a noteworthy advance in eleven years, — the deaths from apoplexy and paralysis, in 1882, exhibiting the greatest numbers for the above period; while those from insanity and convulsions have been exceeded but once each, — the former in 1872, and the latter in 1880. Heart disease (an indefinite term), bronchitis, and peritonitis reached their highest mortality during the past year; pleurisy caused 14 more deaths than in 1881, and was surpassed in numbers in 1874 and 1875 only; pneumonia was more fatal than the average for eleven years; while the deaths from Bright's disease were exceeded only in the previous year.

In the *developmental diseases*, the deaths from old age, and of infants, before and immediately after birth, have steadily increased since 1877, — the mortality from these causes being in 1882 the greatest for eleven years. The number of deaths

from the various accidents of labor was smaller than the average for eleven years, and six below the statistics of the previous year, although the mortality from abortion and puerperal convulsions slightly exceeded the above average. Puerperal fever caused 126 deaths — 10 more than in 1881. The aggregate of these fatal accidents attendant upon child-birth indicate one death to every 140·5 labors, in comparison with one to 136·6 in 1881.

It is to be regretted that the term “teething” should continue to be used, as its significance in reference to death is altogether too indefinite. It may be observed, in this connection, that there are several expressions such as debility, hemorrhage, tumors, inflammation, cephalitis, etc., habitually used in the nomenclature of deaths, which should be strictly avoided, since they furnish very inadequate information of the true causes.

The total number of deaths from *violent causes* in 1882 was the largest in eleven years, with the exception of 1876 and 1879 — the latter year showing an equal mortality. There

were more deaths from railroad accidents than in any year of this period, while freezing was fatal in 36 per cent. more instances than the average for eleven years. The mortality from suicide remained very nearly stationary, as compared with 1881, having increased, however, very largely since 1872.

There were 12 deaths from homicide,—a decided decrease in the eleven years; 25 from the effects of heat; 26 from exposure; 60 from suffocation and strangulation; 5 from epistaxis; 6 from the effects of chloroform and 2 from those of chloral; 5 from lightning. One hundred and seven persons were burned or scalded to death; 44 were fatally poisoned; 4 females died from starvation, and 3 males were murdered.

Table 56 gives the order of fatality from twelve prominent causes of death, for ten years.

Consumption stands pre-eminently first on the list in each year; pneumonia was third in 1873, 1876, and 1877, but ranked second in the other years.

The most noticeable changes have been in diphtheria, which rose through several variations from the twenty-third position in 1873 to the sixth in 1881 and 1882; in cancer, which, ranking fifteenth ten years ago, assumed the tenth place in 1881 and

1882; in bronchitis, which advanced from the twenty-second place in 1873 to the eleventh, at which rank it has remained stationary for the past four years; and in typhoid fever, which gradually declining from the sixth place in 1873 to the thirteenth in 1879, rose to the seventh position in 1881 and 1882.

Scarlatina ranked fifth, in 1873, 1874, and 1875; seventh, in 1876; sixteenth, in 1877; nineteenth, in 1878; ninth, in 1879; seventeenth, in 1880; fourteenth, in 1881; and fell to the twenty-fifth place in 1882, — the lowest rank in the decade.

The twelve leading causes of death formed 59·8 per cent. of the total mortality for 1882, as compared with 59·98 in 1881 and 59·8 in 1880 -- thus showing a striking uniformity.

The other prominent causes of death in order, were as follows: — Infantile, premature, etc., 743; Bright's disease and nephritis, 725; tabes mesenterica, 715; apoplexy, 706; convulsions, 676; enteritis, 528; croup, 491; brain diseases, 489; diarrhœa, 488; hydrocephalus, 477; casualty, 428; dysentery, 398; drowning, and lost at sea, 355; scarlatina, 318; dropsy, 313; peritonitis, 307; fractures and contusions, 301; whooping cough, 265; erysipelas, 252.

* Still-births and deaths from unspecified causes excluded.

The mortality from the most destructive five causes, according to age, may be studied in Table 58. Under the age of five, or in infancy and early childhood, cholera infantum, pneumonia and diphtheria are, as usual, the most fatal; followed by certain affections referable to the brain and nervous system.

From five to ten, the infection diseases and cephalitis are the most prominent, while pneumonia and typhoid fever rank respectively fourth and fifth.

From ten to sixty, consumption has the highest mortality, particularly between the ages of twenty and thirty.

From ten to fifteen, diphtheria, typhoid fever, cephalitis and heart disease rank second, third, fourth and fifth, in the foregoing order.

Typhoid fever holds the second place, pneumonia the third, and heart disease the fourth, between fifteen and thirty.

Childbirth is the fifth in the order of fatality from twenty to thirty.

Pneumonia is the second, and heart disease the third most fatal disease from thirty to sixty; cancer holds the fourth position between forty and sixty, and fifth between thirty and forty.

Heart disease, old age, diseases of the lungs, paralysis and apoplexy are the causes of death, incident to advanced life.

SEX.

MONTHS.

Brain Diseases. — The total number of deaths from disorders of the brain, in 1882, was 3,393, — 1,730 males and 1,663 females. 538 males and 509 females died from paralysis; 358 males and 348 females, from apoplexy; 65 males and 88 females from insanity; 55 males and 57 females from softening; 714 males and 661 females from cephalitis and unspecified brain diseases.

From apoplexy and paralysis together, there were 50 deaths below the age of 30; 78, between 30 and 40; 155, from 40 to 50; 231, from 50 to 60; 391, from 60 to 70; 445, from 70 to 80; 294, over 80. 64·5 per cent. of the deaths occurred at 60 years, or over. In three deaths the ages were not recorded. From insanity 57·5 per cent. of the deaths were of females; 40·6 per cent. died at or above 60 years of age.

In spite of possible sources of error, the undoubted fact is made apparent, by a study of Tables 63 and 64, that diseases of the brain have alarmingly increased since 1860. In that year there were 1,386 deaths from these disorders, which number had increased in 1882 to 3,393, — or 144·9 per cent.; while the population in the same period had increased but 56·1 per cent.

The mortality from apoplexy and paralysis together was advanced in the twenty-three years 179·7 per cent., and insanity 115·5, — a growth which certainly furnishes abundant material for reflection.

Cancer. — Of the 987 deaths from cancer, as compared with 949 in 1881, 641 (including 89 of cancer of the uterus) occurred in females.

The highest ratio in proportion to the total mortality was in Barnstable County; the lowest in Berkshire.

As shown in Table 66, the mortality increased from 551 in 1871 to 928 in the last census year, or 68·4 per cent.; while the increase in the population for the same period was 22·3. From 1871 to 1882 the advance in mortality was equal to 79·1 per cent., and that of the population to 31·8 per cent., thus showing a steady gain in the death-rate.

Cholera infantum caused 2,159 deaths, — 1,133 males and 1,026 females, — equal to 11·23 per cent. per 10,000 of the estimated population, or 1·72 per cent. less than the average for the previous ten years.

Of the deaths from cholera infantum 1,942, or 89·9 per cent., occurred in July, August and September; 104 in October; 34 in June; 30 in November; 14 in May; 9 in December; 8 in March; 7 each, in April and May; 4 in February.

Consumption caused 5,865 deaths — 21 less than in 1881. This was equal to a rate of 3·01 per 1,000 of the estimated population, or ·10 per cent. less than in the previous year, and ·03 per cent. less than in 1880.

There were 623 more deaths of females than of males.

Although in 1882 there was an excess of mortality in the first half of the year, as compared with the second half, yet for a period of ten years, from 1871 to 1880, as is shown in Tables 70 and 71, there was a great uniformity in the mortality of the different seasons. This would seem to indicate that no one of them exerts any especial influence over the fatality of the disease.

The rate of mortality increases up to the age of thirty, and then diminishes through the remaining periods of life. It reaches its maximum between twenty and forty, and particularly between twenty and thirty.

TABLE 72. — *Mortality from Pulmonary Consumption by Sex and Age, 1882.*

Totals,	36,785	5,865	100.00	2,621	3,244

During the last decade there was but little variation in the mortality from consumption, from year to year. While the aggregate of the number of deaths during this period was a little less than one-thirtieth of the entire population of the State in 1875, the mortality increased only 8.2 per cent., as against 12.1 per cent. in the previous ten years.

These statistics are encouraging, since they show that, although the disease continues to advance slightly in its fatality, yet, from various causes, chiefly from a better understanding of the disease and its production, the increase is not at all proportionate to the growth of the population.

The order of fatality from consumption and cancer for ten years, together with that from all causes, and their mean rates per 1,000 of the population are given, by counties, in Table 74.

In relation to the total mortality Suffolk holds the highest rank, and Franklin the lowest. From both consumption and cancer Dukes and Nantucket, taken together, stand first, with Berkshire the lowest in consumption, and Hampden in cancer.

Table 75 shows the number of deaths from consumption by counties, in 1882, and Table 76 the ratios to the total mortality, for ten years. It will be seen that Middlesex has the highest percentage and Berkshire the lowest. Suffolk stands second in order, Barnstable seventh, and Dukes and Nantucket ninth.

Hampden,	108		
Hampshire,	17	The State,	1,771

In all the counties, with the exception of Berkshire and Hampden, there was a decrease, more or less marked, in the mortality from diphtheria and croup. In the former county

there was an increase of 17 deaths, and in the latter, of 36 deaths.

Eight hundred and ninety-six males and 875 females died from these diseases : 64·3 per cent. of the deaths were of children under five years of age ; 88·6 per cent. under ten years.

By far the largest percentage of the mortality occurred in the fourth quarter of the year.

TABLE 80. — *Deaths from Diphtheria and Croup by Seasons—1882.*

Measles was noticeably less fatal than in any of the previous twenty-two years, with the exception of 1876 and 1879. Of the 68 deaths, 56 per cent. took place in the months of June, July and August: 50 were in children under 5 years of age; 8, from 5 to 10; 3, from 10 to 15; 3, from 40 to 50; 2, from 15 to 20; 1, from 70 to 80. The age of one decedent was not reported.

Pneumonia, although causing 35 fewer deaths than in 1881, and 144 less than in 1880, has increased 57·7 per cent. in fatality since 1870. With an estimated growth, however, in the population of 31·8 per cent., this increase is not so marked.

In relative rank, as shown in Table 84, Franklin County stands first in the rate of mortality, and Dukes and Nantucket last. In this connection an interesting comparison may be made between Tables 84 and 74.

TABLE 84. — *Mean Death-Rates from Pneumonia, in Order of Counties, Ten Years, 1871-1880.*

PNEUMONIA.		PNEUMONIA.	
Massachusetts,	1.45	Hampden,	1.41

For a period of ten years (Table 86) the yearly variations in the ratios to the total mortality have been comparatively slight. In relative order, the Valley and Western counties stand noticeably high.

By seasons the highest mortality was in April, but, as usual, in the first quarter of the year; that of the second quarter was somewhat greater than is generally recorded.

TABLE 87. — *Mortality from Pneumonia by Months and Quarters 1882.*

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.

Scarlet fever had the lowest death-rate in twenty-one years, — $\cdot 4$ of one per cent. lower than in 1881, and $4\cdot 5$ per cent. below the average for the above period. In proportion to the total mortality, the decrease in the percentage of deaths was also very striking.

1872, . .	1,377	3·93	8·9				

In Dukes and Nantucket counties there were no deaths from scarlet fever, and one only in Barnstable; the highest mortality was in Suffolk, with Middlesex following next in order.

Of the 318 deaths, 209, or over 65 per cent. occurred in children under the age of 5; 81, between 5 and 10; 14, between 10 and 15; 4, between 15 and 20; 3, between 20 and 30; 5, between 30 and 40; and 2, in which the age was not recorded.

The mortality was very nearly equally divided between the two halves of the year, although the number of deaths in the last two months was unusually large. The deaths, by months, were as follows: 45, in December; 32, in November; 30, in March; 29, in October; 27, in August; 26, in June; 25, in February; 24, in January; 23, in April; 22, in July; 21, in May; 14 in September.

One hundred and forty-six of the deaths were of males, and 172 of females.

Small-Pox. — The rate of mortality, which for the twenty-one years previous to 1873, was subject to periodical variations, has, since the latter year, continued relatively low.

Of the 45 deaths from small-pox which occurred in the past year, 2 were in Adams and 3 in Pittsfield in Berkshire County ; 3 in Fall River in Bristol ; 2 in Agawam, 7 in Holyoke, 2 in Palmer and 1 each in Montgomery, Russell and West Springfield in Hampden ; 2 in South Hadley in Hampshire ; 1 in Concord and 3 in Pepperell in Middlesex ; 1 in Hyde Park in Norfolk ; 8 in Boston ; 4 in Millbury and 1 each in Milford, Southbridge and Northbridge in Worcester. More than one-quarter of the entire number were in Hampden County.

Twenty-four deaths were of males ; 21 of females. Twenty-five, or about one-half, were of persons under ten years of age ; 16 from 10 to 30 ; 11 of persons over 30 ; and 3 in which the ages were not reported.

Typhoid Fever. — The percentage of mortality (5·6) was about the same as in 1881, but much below the average for twenty-six years.

Five hundred and fifty-six deaths were of males, 523 of females.

All periods of life were represented in the mortality, 28 per cent. occurring between the ages of 20 and 30, and 45 per cent. between 15 and 30.

There were 198 deaths in October; 172 in September; 102 in November; 96 in August; 89 in December; 70 in January; 69 in May; 60 in February; 59 each in March and April; 56 in June; 49 in July. A little more than one-third of the entire number occurred in September and October.

By a comparison of the different counties (Table 93), it will be seen that the fatal forms of typhoid fever seek by preference the more sparsely settled districts, in which, presumably, the sanitary conditions are defective, rather than those sections which are more populous. Dukes and Nantucket had in the last fourteen years a death-rate from this disease of 11·9 per 10,000 of the population (by the census of 1875), and Barnstable 10·4; as against 7·8 in Suffolk and 7·3 in Middlesex.

Whooping Cough.—In proportion to the population the highest mortality occurred in Bristol County, the lowest in Barnstable.

Of the 265 deaths, 252, or 95 per cent., were in children under 5 years of age. There were 34 deaths in March; 31 in August; 27 each in January and May; 26 in February; 25 each in June and July; 14 in September; 12 in October; 11 in December; 8 in November.

One hundred and twenty-five deaths were of males, 140 of females.

DIVORCES.

DIVORCES IN MASSACHUSETTS.—1863–1882.

The subject of divorce is one which should be properly studied in connection with that of marriage, but owing to the unavoidable delays attendant this year upon the compilation of new statistics, it has become necessary to present the matter in a supplementary form.

The late date, upon which the act providing for the return of divorces was passed, must be an excuse for whatever faults may be thought to exist in the method of tabulation. The statistics, however, are reliable; since, for the years previous to 1879, they were gathered directly from the dockets of the courts by a force especially detailed from the Bureau of Statistics of Labor, to which Bureau acknowledgment is duly made for the assistance rendered in the preparation of this Report. For the years 1879–1882 the clerks of the courts have made their returns upon blanks framed in accordance with the law. In a few instances the chief cause for divorce was not made prominent in these returns, and as it was deemed advisable to tabulate simply the statute causes, the multiple specifications have been reduced sufficiently accurately to the nine legal grounds for which divorce may be granted.

In a very few cases *nisi* decrees have been returned as absolute — the number, however, being so inappreciably small that the results have been in no wise materially affected.

HISTORY OF DIVORCE LEGISLATION.

The statistics of divorce have assumed an unusual importance in discussing the social condition of the people, from the fact that the numbers have so strikingly increased during the past twenty years. Hence it is necessary to briefly review the

history of the legislation upon this subject, in order that an intelligent analysis of the following tables may be made.

The first statute relating to divorce was passed on March 16, 1786 — five and one-half years after the first legislature had met under the Constitution of Massachusetts. This act provided that a full divorce, or divorce from the bond of matrimony, might be granted for two causes only, viz., adultery and impotency; while a limited divorce, or divorce from bed and board, might be decreed for the additional cause of extreme cruelty. By an act passed in 1810 a limited divorce was authorized to the wife, when her husband had utterly deserted her, or had grossly or wantonly and cruelly neglected or refused to provide sufficient for her maintenance.

In 1836 it was enacted that sentence of imprisonment of either party at hard labor, for a period of seven years or more, should be added to adultery and impotency as a cause for full divorce; while limited divorce might be granted to either party for extreme cruelty or utter desertion, and to the wife for wanton, cruel and gross refusal or neglect on the part of the husband to provide sufficient maintenance for her.

By the Acts of 1838 wilful and utter desertion for five consecutive years became an additional cause for full divorce in favor of the innocent party; while in 1850 it was still further provided that full divorce might be decreed to either party, when the other separates therefrom and joins, and for three years remains united with any religious sect or society, believing, or professing to believe, that the relation of husband and wife is void and unlawful.

No further legislation upon this subject took place until the general revision of the Statutes in 1860. In this year the General Statutes authorized full divorce for adultery, impotency, union for three years with a religious sect denying the validity of marriage, imprisonment at hard labor for five years, and desertion for five consecutive years to the deserting as well as to the deserted party. In the latter case a proviso was introduced limiting divorce to the deserting party, only after it had been shown that the desertion was for extreme cruelty, or, in case of the wife, neglect by her husband to provide. By the same Statutes, limited divorce might be granted for extreme cruelty, complete desertion, gross and confirmed habits of in-

toxication contracted after marriage, cruel and abusive treatment, and in favor of the wife, for neglect on the part of the husband to properly maintain her. The chapter also retains the provision of 1857, by which a limited divorce may be made absolute, on petition of the party to whom the original limited divorce had been granted, after a separation of five consecutive years, and on the petition of the guilty party after the separation had continued for ten consecutive years.

In 1867 it was enacted that all divorces might be decreed *nisi*, which *nisi* decrees might be made absolute, in the discretion of the court, after the lapse of six months. By the Acts of 1870 all limited divorces, from bed and board, were thenceforth prohibited; all pending libels for limited divorce were to be considered as libels for full divorce, and all existing decrees for limited divorce were to be treated as *nisi* decrees under that law. Further, all the causes specified in the preceding paragraph, for which limited divorce had previously been provided, were thereafter to be considered as causes for full divorce, provided that in these cases decrees *nisi* should first be entered, which must be made absolute upon proof that the parties to the libel had lived apart for five consecutive years, and might be so made in the discretion of the court after the lapse of three years. Thus, in 1870, there were nine causes for which absolute divorce might be granted, except that in four of them a *nisi* decree must remain three years at least, before being made absolute.

In 1873 divorce *nisi* was prohibited, except as provided by the Statute of 1867, as mentioned in the preceding paragraph. The Acts of this year also decreed that thereafter a full divorce might be granted for all causes for which a *nisi* decree was then warranted; provided that, in the case of desertion, a complete separation should have existed for three consecutive years next preceding the filing of the libel. The law still further provided that a *nisi* decree might at once be made absolute, except in the case of desertion; when a separation for at least three consecutive years must have existed. It was also enacted by this law, that full divorce might be granted for gross and confirmed habits of intoxication, no matter at what period, whether before or after marriage, this habit had been contracted. By this enactment, then, there were nine causes for

which full divorce might be granted, except that desertion must have continued three years, while in any case a *nisi* decree might be entered by the court for six months.

In 1874 an act was passed which provided that all decrees of divorce must be rendered absolute and not *nisi*, whenever personal service is made on the libellee, or when the libel is entered at a term previous to the one in which the decree is granted. A further provision of this same act relating to *nisi* decrees was declared unconstitutional by the Supreme Court of the State; and consequently in 1875 it was enacted that any limited decree, or any decree *nisi*, might be made absolute after a separation of three years, upon the petition of the innocent party, and after five years upon the petition of either.

Finally, by an act passed in 1881, it was provided that all decrees for divorce must be first entered *nisi*, to become absolute after the expiration of six months from the entry thereof, on application of either party to the clerk of the court, unless the court has for sufficient reason, upon application of any party interested, otherwise ordered. This same act decreed that the court, before which any libel for divorce is pending, may, without entering a decree of divorce, continue the same upon the docket from time to time, and during such continuance make such orders and decrees concerning a temporary separation, the separate maintenance of the wife and support of minor children, as may be deemed necessary.

In 1877, the provision of the General Statutes, authorizing jury trials in divorce suits, was repealed; and in 1881 it was enacted that in all cases where a divorce had been granted for adultery or other criminal offence committed within the State, and within the time provided by law for making complaints and finding indictments, the court granting the divorce may cause the district attorney to be notified, who shall then cause complaint to be made before the proper magistrate, or a presentment to the grand jury.

In view of the facility with which a divorce may now be obtained — a facility which no one, who has studied the subject can fail to recognize as having been steadily increased through the whole history of the legislative enactments, it will be of interest to consider very briefly the changes in the laws relating to subsequent marriages. In 1841 a statute was passed pro-

hibiting the guilty party, in all cases of divorce, from marrying while the innocent party was alive.

In 1853 it was enacted that, in cases of divorce for desertion, the court might permit the deserting party to marry again, and in 1855 the statute of 1841 was repealed, and a new one enacted, authorizing the court to allow the guilty party to marry again in all cases, except when the divorce had been granted for adultery. In 1864 it was provided by law that even in cases of divorce decreed for adultery, the guilty party might be allowed to remarry after three years, unless actually tried and convicted of the above crime.

The Acts of 1873 authorized the court to allow any person, against whom a divorce had been granted, to marry ; but by a statute passed in 1881 two years must have elapsed from the time of the entry of the final decree of divorce, before the guilty party can again contract marriage. At the expiration of this period, however, it is not necessary to petition the court.

The foregoing summary of the different legislative enactments shows that there are now nine separate causes for which the Supreme Judicial Court of the Commonwealth may grant divorce from the bonds of matrimony. These causes are as follows : —

Adultery. Acts of 1786.

Impotency. Acts of 1786.

Sentence to imprisonment at hard labor for five years or more. Acts of 1836 ; the minimum term being first seven years, but reduced to five years in 1860.

Desertion for three consecutive years next prior to the filing of the libel. Acts of 1810 ; limited divorce being permitted to the wife, when utterly deserted by her husband. The Acts of 1836 permitted it to either party for utter desertion. That of 1838 authorized full divorce to the innocent party for desertion, which had continued for five consecutive years. That of 1857 decreed that either party might be granted a divorce, provided that, when sued for by the deserting party, it must be shown that the desertion was caused by extreme cruelty ; or, in the case of the wife, by neglect on the part of the husband to make proper provision for her maintenance. The Acts of 1873 reduced the period of desertion from five to three years.

Separation without consent, refusal to cohabit, and union for three years with a religious sect or society holding the relation of husband and wife unlawful. Acts of 1850. The language of the present statute is practically the same as that originally passed.

Extreme cruelty. Acts of 1786, — being the one cause for which limited divorce might be granted. By the Statute of 1870, which prohibited divorce from bed and board, it became a cause for absolute divorce.

Gross and confirmed habits of intoxication. Acts of 1860, — being a cause for limited divorce only, and provided that the habit had been contracted after marriage. By the Statute of 1870 it became a cause for full divorce in the same form. The Statute of 1873 repealed the proviso.

Cruel and abusive treatment. Acts of 1860. By this enactment it was a cause for limited divorce only, but became one for full divorce in 1870.

Neglect to provide. Acts of 1810, — appearing as a cause for limited divorce. In 1870 it was made a cause for full divorce. This method is open to women only.

The following tables show the number of divorces granted during the past twenty years, by counties and statute causes, together with a State recapitulation, by years, counties and statute causes. It will be observed that no divorces have been granted for union with a religious sect, holding the relation of husband and wife unlawful. The sudden variations noticeable in certain years are mostly due to the changes in the laws, although the increase in the number of divorces granted for adultery, in 1866, is to be explained undoubtedly by its greater prevalence during the war period.

DIVORCES BY YEARS AND CAUSES.

By a study of the foregoing tables, one cannot but be impressed by the great increase in the number of divorces during the past twenty years—a fact which can be partially explained by an increase in the number of marriages, although their ratio of increase is not proportionate to that of divorces; and partially by the greater facility with which divorces can now be obtained in comparison with the status in 1863. In the latter year there were 10,873 marriages, and in 1882, 17,684—an increase equal to 62·6 per cent.; while the number of divorces has risen in the same period from 207 to 515, or 147·6 per cent., with an estimated increase in the population of 53·4. Reckoned from 1870, in which year all the nine causes had become legalized, it appears that the number of marriages has increased 20·1 per cent., while the divorces have increased 35·9 per cent. During the last ten years the ratio of increase in the number of marriages has been 7·6 per cent., against 14·7 per cent. for divorces. On the contrary, if a comparison is made between the statistics of the last four years and the four years prior to 1879, it will be seen that there has been a decrease in the number of divorces, equal to 10 per cent. in favor of the former period.

The records show that in the twenty years covered by the tables, 2,759 divorces were granted on complaint of the husband, and 5,851 on complaint of the wife; in other words, 67·9 per cent. of all the divorces were for causes affecting the domestic peace and happiness of the wife. Of the number of divorces decreed for desertion, 64·8 per cent. were in favor of the wife, and of those decreed for adultery, 55·6 per cent., or but a little over one-half, were granted to the female.

Analyzing the statistics more particularly, it appears that, in the above period, 42·5 per cent. of the total number of divorces were for adultery, and 42·5 per cent. were on the ground of desertion, or 79·0 per cent. for the two causes combined. It is also to be observed that the various causes have increased in frequency in the following ratios:—adultery, 20·6 per cent.; desertion, 171·5 per cent.; extreme cruelty, 366·6—or, reckoned from 1870, when limited divorces were prohibited, 155·5 per cent.; neglect to provide, 100 per cent.; intoxica-

tion, computed from 1873, when the proviso that the habit must have been contracted after marriage was cancelled, 121·6 per cent.; cruel and abusive treatment (thirteen years), 700 per cent. The foregoing large ratios of increase are in the main simply evidences of the readiness with which persons have availed themselves of the change in the law made in 1873, regarding the substitution of absolute divorce for *nisi* decrees, to which reference has already been made. Since this year, however, the ratios have decreased as follows:—adultery, 74·4 per cent.; desertion, 137·2 per cent.; extreme cruelty, 344·9 per cent.; cruel and abusive treatment, 500 per cent. This decrease is much more marked in comparison with the statistics of 1874, when the above change went into full effect—there being actually fewer divorces for all the prominent causes in 1882, with the exception of desertion (four more) and intoxication (equal numbers), than in that year.

DIVORCE BY COUNTIES.

Any computation, based upon the comparative statistics of the different counties of the State, must become what unreliable, unless the relative changes in their population are taken into consideration. Hence the following table is designed to show a comparison between the ratios of increase in the number of divorces and marriages, and that of the population, for a period of twenty years, by counties. The rates for the divorces and marriages have been calculated for the term between 1863 and 1882, while that of the population has been computed from the statistics of the census years 1860 and 1880, as being a fair indication of the changes in the relative rank of the counties. In studying this table the fact should not be forgotten that the large increase in the number of divorces is mainly due to the changes in the laws, although these changes have no effect upon the comparative ratios. It should also be remembered that the geographical limits of Suffolk, Middlesex and Norfolk counties have been somewhat altered by annexation of certain cities and towns to Suffolk, as has been mentioned on page 19 of this report.

TABLE 16. — *Rates of Increase of Divorces, Marriages, and Population, by Counties. — Twenty Years.*

COUNTIES.	Ratio of increase of Divorces. 1863 - 1882.	Ratio of increase of Marriages. 1863 - 1882.	Ratio of increase of Population. 1860 - 1880.
THE STATE,	147·6	62·6	44·8
Barnstable,	133·3	40·3-	12·8-
Berkshire,	242·8	55·7	25·2
Bristol,	342·7	137·4	48·3
Dukes and Nantucket,	25·0	30·7-	30·7-
Essex,	443·7	89·0	47·6
Franklin,	166·6	28·1	14·4
Hampden,	94·7	74·2	81·5
Hampshire,	166·6	28·3	25·1
Middlesex,	103·5	76·3	46·9
Norfolk,	30·0	6·9-	13·9
Plymouth,	130·0	40·9	14·2
Suffolk,	88·8	70·5	101·3
Worcester,	163·6	50·8	42·1

It thus appears that in Suffolk County alone the ratio of increase in the population is greater than that of the divorces, although the latter have increased in a greater proportion than the marriages. The greatest percentage of divorce increase has been in Essex, and the lowest in Dukes and Nantucket. In comparison, however, with the change in the population, Norfolk stands the lowest, since with an increase of 25 per cent. in the number of divorces, Dukes and Nantucket have suffered a decrease in their population of 30·7 per cent. and the same ratio in the number of marriages. In Barnstable County, also, there has been an increase in the number of divorces, with a decrease in the number of marriages and in the population. In Norfolk there has been a decrease in the

number of marriages of 6·9 per cent. The highest rate of increase in the population appears in Suffolk, and the lowest in Norfolk.

In Table 17 may be studied the relative ratios of increase from 1873, by counties. The rates of increase in the population have been computed from the statistics of the census years 1870–1880.

TABLE 17. — *Rates of Increase of Divorces, Marriages, and Population. — Ten Years.*

COUNTIES.	Ratio of increase of Divorces, 1873 - 1882.	Ratio of increase of Marriages, 1873 - 1882.	Ratio of increase of Population, 1870 - 1880.
THE STATE,	14·7	7·6	22·3
Barnstable,	28·5-	27·4-	2·7-
Berkshire,	20·0	6·0	6·4
Bristol,	83·3	11·8	35·1
Dukes and Nantucket,	150·0	7·7-	1·4
Essex,	13·0	14·1	17·0
Franklin,	13·0	5·2	10·1
Hampden,	94·7	21·7	32·8
Hampshire,	60·0	13·4	6·4
Middlesex,	67·7-	1·3	15·8
Norfolk,	62·5	13·0-	7·8
Plymouth,	109·0	4·0	13·2
Suffolk,	4·0	8·3	43·2
Worcester,	38·0	12·0	17·7

For a period of ten years, the largest percentage of increase in the number of divorces has been in Dukes and Nantucket counties, and the smallest in Suffolk. In Barnstable and Middlesex there has been a decrease of 28·5 and 67·7 per cent. respectively. In the former county there has likewise been a decrease in the number of marriages and in the popula-

tion, and in Dukes and Nantucket and Norfolk, in the number of marriages. Suffolk shows the greatest increase in the population, and Dukes and Nantucket the smallest.

Dividing the State, according to the situation of the counties, into what may be properly designated the Metropolitan, Rural and Cape districts (*vide*, page 53), it will be seen that the average of the ratios of increase in the number of divorces for ten years is 94 per cent. for the Rural, and 37.5 per cent. for the Cape districts; while the Metropolitan division shows an average decrease of 3.1 per cent. The average rates of increase, in the number of marriages, for the same period are 11.5 per cent. for the Rural counties, and 8.9 for the Metropolitan; the Cape division on the contrary has had a decrease of 6.4 per cent. The population of the three divisions, in the order given above, increased from 1870 to 1880 in the average proportions of 23.8 per cent., 13.8 per cent. and 11.5 per cent. respectively. These figures would indicate, therefore, that the number of divorces has increased most largely in those portions of the State which contain the smallest population.

In 1870 Suffolk County had 27 per cent. of the whole number of divorces granted, with 19 per cent. of the population of the State; Middlesex had 17 per cent. of the divorces, with 19 per cent. of the population; Essex had a little less than 16 per cent. of the divorces, with about 14 per cent. of the population; Worcester had a little less than 12 per cent. of the divorces, with rather more than 13 per cent. of the population; Bristol had very nearly 8 per cent. of the divorces, with 7 per cent. of the population; Norfolk had less than 3 per cent. of the divorces, with 6 per cent. of the population. The statistics of 1875 give Suffolk 27 per cent. of the divorces, with 22 per cent. of the population; Middlesex 17 per cent. of the divorces, with 16 per cent. of the population; Essex 14 per cent. of the divorces, with 13 per cent. of the population; Worcester about 12 per cent. of both the divorces and the population; Bristol 8 per cent. of the divorces, with about the same per cent. of the population; Norfolk rather more than 3 per cent. of the divorces, with 5.3 per cent. of the population. In 1880 Suffolk had 27 per cent. of the divorces, with rather more than 21 per cent. of the population; Middlesex 13 per cent. of the divorces, with a little less than 17 per cent. of

the population; Essex a little less than 17 per cent. of the divorces, with rather more than 13 per cent. of the population; Worcester a little more than 14 per cent. of the divorces, with 12·7 per cent. of the population; Bristol 4·7 per cent. of the divorces, with nearly 7 per cent. of the population.

In the period of twenty years (1863–1882) Suffolk had 26·2 per cent. of the whole number of divorces; Middlesex 16·3 per cent.; Essex 14·7 per cent.; Worcester 12·3 per cent.; Bristol 8·2 per cent.; Hampden 6·5 per cent.; Berkshire 3·8 per cent.; Plymouth 3·3 per cent.; Norfolk 2·4 per cent.; Hampshire 2·2 per cent.; Barnstable 1·9 per cent.; Franklin 1·8 per cent.; Dukes and Nantucket ·6 of one per cent.

In analyzing the various causes for which divorces have been granted in the different counties for a period of twenty years, it appears that Suffolk has had 27·7 per cent. of the whole number decreed for adultery, and 23·6 per cent. of that for desertion. The relative proportions in Middlesex are 17·1 per cent. for adultery and 15·8 per cent. for desertion; in Essex 13·9 per cent. for adultery, and 14·8 per cent. for desertion; in Worcester 10·9 per cent. for adultery, and 14·1 per cent. for desertion; in Bristol 8·7 per cent. for adultery, and 8 per cent. for desertion; in Norfolk 2·2 per cent. for adultery and 2·8 per cent. for desertion.

In proportion to the whole number of divorces granted in each county, for a period of twenty years, there have been 46·7 per cent. decreed for adultery, and 43·5 per cent. for desertion in Franklin; 39·4 per cent. for adultery and 42·1 per cent. in Bristol; 39 per cent. for adultery and 38·5 per cent. for desertion in Suffolk; 38·9 per cent. for adultery, and 39·8 per cent. for desertion in Berkshire; 38·3 per cent. for adultery, and 40·9 per cent. for desertion in Middlesex; 36·2 per cent. for adultery and 38·2 per cent. for desertion in Hampden; 34·8 per cent. for adultery and 43·1 per cent. for desertion in Essex; 34·1 per cent. for adultery and 49·5 per cent. for desertion in Norfolk; 33·7 per cent. for adultery and 62·4 per cent. for desertion in Barnstable; 32·5 per cent. for adultery, and 45·6 per cent. for desertion in Worcester; 30·7 per cent. for adultery and 48·9 per cent. for desertion in Hampshire; 25 per cent. for adultery, and 50 per cent. for desertion in Dukes and

Nantucket; 22 per cent. for adultery and 56·2 per cent. for desertion in Plymouth. If the same division of the State into Metropolitan, Rural and Cape districts is made, as was shown in a previous paragraph, it appears that the average of the above ratios for adultery is 30·9 per cent. for the Cape counties and 38·1 per cent. for the Rural counties, as against 36·1 per cent. for the Metropolitan division. For desertion the aggregates are 52 per cent. for the Cape, 42·6 per cent. for the Rural and 42·1 per cent. for the Metropolitan districts.

A review of these computations, as to the relative rank of the counties in the prevalence of adultery and desertion as causes for divorce, would seem to indicate that these causes operate to a much greater extent in the more thickly populated sections of the State. When, however, it is considered that the marriage rates for such districts are proportionately higher than in the counties with a smaller population, the difference becomes less marked. As has been shown, in relation to the total number of divorces granted in each county, that decreed for adultery and desertion seems to be greater in the Cape and Rural divisions than in the Metropolitan.

Of the eight causes for divorce mentioned in the tables, Bristol, Essex, Middlesex, Suffolk and Worcester furnish statistics under each of the specified heads; Berkshire, Hampden, Norfolk and Plymouth under seven of them; Dukes and Nantucket, Franklin and Hampshire under six; and Barnstable under but three.

In 1874 Barnstable, Middlesex and Suffolk had the greatest number of divorces, which were granted in those counties for the twenty year period; Dukes and Nantucket, and Norfolk in 1875—the number, however, being equalled in 1882 in the former; Hampden, Hampshire and Plymouth in 1878; Worcester in 1879; Berkshire and Essex in 1880; Bristol and Franklin in 1881.

In relation to the special causes for divorce, the greatest number of those granted for adultery in Berkshire occurred in 1865, the same number being decreed in 1870 and 1880; in Bristol, Dukes and Nantucket, Hampden, Norfolk and Suffolk in 1866; in Middlesex in 1867; in Plymouth in 1869; in Essex in 1870 and 1871; in Worcester in 1873; in Barnstable in 1876; in Hampshire in 1878; in Franklin in 1881. For

desertion the year 1874 leads in Barnstable, Hampden, and Middlesex; 1875 in Dukes and Nantucket and Norfolk; 1878 in Hampshire, Plymouth and Suffolk; 1879 in Worcester; 1880 and 1881 in Essex; 1880 in Berkshire; 1881 in Bristol; 1882 in Essex. For intoxication, the greatest number was recorded in 1874 and 1875 in Middlesex; in 1875 and 1876 in Norfolk; in 1875, 1876 and 1878 in Hampden; in 1876 in Essex, Suffolk and Worcester; in 1877 in Berkshire; in 1878 in Plymouth; in 1882 in Bristol. For extreme cruelty, the year 1874 is the most prominent in Suffolk; 1875 in Worcester and Berkshire; 1876 in Middlesex and Plymouth; 1877 in Bristol and Essex; 1880 in Hampden. In other words the year 1866 leads as to the number of divorces granted for adultery in the largest proportion of the counties; 1874 and 1878 for desertion; 1876 for intoxication; and 1875, 1876 and 1877 for extreme cruelty.

RATIO OF DIVORCES TO MARRIAGES.

In order that a more correct estimate may be formed of the frequency with which divorces have been granted during the past twenty years, the following tables have been prepared, showing the relative ratio of divorces to marriages, by years, counties and statute causes :

TABLE 18. — *Ratio of Divorces to Marriages. — Twenty Years.*

YEARS.	Number of Mar- riages.	Marriage- Rates per 1,000.	Number of Divorces.	Ratio of Divorces to Marriages.
1863,	10,873	17·36	207	1 to 52·5
1864,	12,513	19·87	270	1 to 46·3
1865,	13,051	20·60	333	1 to 39·2
1866,	14,428	22·15	392	1 to 36·8
1867,	14,451	21·57	282	1 to 51·2
1868,	13,856	20·11	339	1 to 40·8
1869,	14,826	20·92	339	1 to 43·7
1870,	14,721	20·20	379	1 to 38·8
1871,	15,746	21·07	325	1 to 48·4
1872,	16,142	26·07	343	1 to 47·1
1873,	16,437	20·92	449	1 to 36·6
1874,	15,564	19·32	647	1 to 24·1
1875,	13,663	16·54	577	1 to 23·6
1876,	12,749	15·43	525	1 to 24·2
1877,	12,758	15·40	553	1 to 23·1
1878,	12,893	15·47	600	1 to 21·4
1879,	13,802	16·08	546	1 to 23·4
1880,	15,538	17·42	580	1 to 26·8
1881,	16,768	*17·96	409	1 to 40·9
1882,	17,684	*18·40	515	1 to 34·3
Totals,	288,463	—	8,610	1 to 33·5

Worcester,	34,631	346	1 to 100·0	486	1 to 71·2	75	1 to 461·7	55	1 to 629·6	100	1 to 346·3

While the population of the State is estimated to have increased 669,219, or 53·4 per cent. during the past twenty years, and the marriage rate but 1·04 per thousand, it is a startling fact that the ratio of persons divorced to the population has advanced, in the same period, from 1 in 3,025 to 1 in 1,862; and that of divorces to marriages from 1 in 52·5 to 1 in 34·3, or a little more than one-half.

Taking the whole twenty years into consideration, the average ratio for the State is found to be one divorce to every thirty-three and one-half marriages. For the last four years this ratio is one divorce to every thirty-one marriages, as compared with one to twenty-three in the previous four years. Whether this decrease is illusory must be proved by the statistics of future periods. The years 1873, 1881 and 1882 show the greatest number of marriages for the term under review, while the average ratio for these years is 1 divorce to 37·2 marriages, or a gain of 1 in 3·7 in comparison with the State as a whole. When compared with the average of the seven years between 1873 and 1882, the difference is found to be 1 in 13·4 in favor of the three-year periods. The smallest ratio of divorces in comparison with the marriages, since 1872, occurred in the year 1880.

Upon an examination of the statistics given in Table 19, it will be noticed that, while the average ratio of divorces to marriages, for twenty years, is 1 in 33·5 for the State, that for Norfolk is but 1 in 62·6. This county is thus placed at the head of the list in its recognition of the permanency of the marriage vows. On the contrary, the ratio for Dukes and Nantucket, taken together, which is the lowest of all the counties, would seem to indicate that the contract of marriage is held in comparatively light esteem by them. The other counties take rank in the following order:—Hampshire, 1 to 41·5; Plymouth, 1 to 39; Barnstable, 1 to 36·5; Franklin, 1 to 36·4; Middlesex, 1 to 33; Suffolk, 1 to 32·6; Essex, 1 to 32; Worcester, 1 to 31·9; Bristol, 1 to 31·1; Hampden, 1 to 30·7; Berkshire, 1 to 30. In other words, the proportion of divorces to marriages is nearly twice as great among the city population of Suffolk as among the town population of Norfolk; although the Rural and Cape counties of Berkshire, Hampden, Bristol and Dukes and Nantucket make a less favorable showing in this

respect than the Metropolitan county of Suffolk. The three divisions, compared, give average ratios of 1 to 39·3 for the Cape, 1 to 34·6 for the Rural, and 1 to 32·3 for the Metropolitan counties — thus showing but a slight difference in favor of the smaller towns of the Rural district over the more thickly populated cities and towns of the Metropolitan; but a much greater difference in favor of the Cape division.

If a still further study is made of the statistics by an analysis of Table 20, it will be seen that, for the cause of adultery, there were fewer divorces decreed in proportion to the number of marriages during the twenty-year period in Norfolk than in any other county of the Commonwealth, and the greatest number in Berkshire. The other counties take rank as follows:— Plymouth, with 1 divorce to 176·9 marriages; Hampshire, 1 to 134·9; Dukes and Nantucket, 1 to 113·6; Barnstable, 1 to 108·3; Worcester, 1 to 100; Essex, 1 to 92·1; Middlesex, 1 to 86·1; Hampden, 1 to 84·9; Suffolk, 1 to 83·5; Bristol, 1 to 78·9; Franklin, 1 to 77·5. For desertion, Norfolk makes the most favorable showing, as it does also under the head of intoxication. In relation to the former cause, Dukes and Nantucket have the highest ratio of divorces to marriages (one to 54·6), or more than twice as great as that for Norfolk; while Suffolk holds the third place, with Middlesex fifth in order, and Essex eighth. The Cape counties, as a rule, make the least favorable showing — a fact which may possibly be due to the more maritime character of their population. Hampden has the worst record for intoxication and extreme cruelty, while Franklin makes by far the best showing for both these causes. The ratio of Dukes and Nantucket, Essex, and Suffolk are above that of the State for intoxication. Norfolk presents the smallest proportion of divorces decreed for all the other causes combined, and Plymouth the largest.

Tables 21 and 22 show in detail the statistics for 1882.

TABLE 22. — *Ratio of Divorces to Marriages, by Counties. — 1882.*

COUNTIES.	Number of Marriages.	Number of Divorces.	Ratio of Divorces to Marriages.
Barnstable,	233	7	1 to 33·3
Berkshire,	545	24	1 to 22·7
Bristol,	1,610	55	1 to 29·1
Dukes and Nantucket,	65	5	1 to 13·0
Essex,	2,511	87	1 to 28·8
Franklin,	319	8	1 to 39·8
Hampden,	1,122	37	1 to 30·3
Hampshire,	389	8	1 to 48·6
Middlesex,	3,147	59	1 to 53·3
Norfolk,	708	13	1 to 54·4
Plymouth,	668	23	1 to 29·0
Suffolk,	4,283	102	1 to 41·9
Worcester,	2,084	87	1 to 23·9
The State,	17,684	515	1 to 34·3

But little information can be derived from a comparison between the number of divorces granted in 1882 and the population, since the latter can only be approximated. Basing the presumable relative rank of the counties as to population, however, upon that which they held by the census of 1880, it appears that Suffolk has the first rank both in the number of its inhabitants and the divorces; Middlesex stands second in population and fourth in divorces; Essex third in population and second in divorces; Worcester fourth in population and second also in divorces; Bristol fifth, both in population and in divorces; Hampden sixth in population and likewise in divorces; Norfolk seventh in population and ninth in divorces; Plymouth eighth in both; Berkshire ninth in population and seventh in divorces; Hampshire tenth in both; Franklin eleventh in population and tenth in divorces; Barnstable and Dukes and Nantucket twelfth and thirteenth respectively both in population and divorces. It would thus seem that the relative number of divorces in the various counties bears a tolerably accurate proportion to the population.

The percentage of divorces granted for adultery in 1882 to the whole number is 22·7 per cent., and for desertion 50·2 per cent., an aggregate of 72·9 for the two causes. Seventy-four

and seven-tenths per cent. of the total number of divorces were granted to females; 57.2 for adultery alone, and 72.5 for desertion. While the number of divorces in 1882 was but four more than the average for the previous three years, adultery, as a cause, increased thirty per cent. over this average, as compared with a decrease in the number of marriages of twenty-eight and one-tenth per cent., and an increase in their estimated rates of one and seven-tenths per cent. For desertion the increase was six and six-tenths per cent., and for intoxication twenty-eight per cent., whereas extreme cruelty remained stationary, and cruel and abusive treatment decreased eighty-seven and five-tenths per cent.

In respect to the ratio of divorces to marriages (Table 22), that for the State, as a whole, is 1 in 34.3; while Barnstable County has a record of 1 in 13, or more than four times greater than the proportion for Norfolk, which is 1 in 54.4. Suffolk stands relatively very high in the list, with one divorce only to every forty-one and nine-tenths marriages. The remaining counties take rank as follows: Middlesex, 1 to 53.3; Hampshire, 1 to 48.6; Franklin, 1 to 39.8; Berkshire, 1 to 33.3; Hampden, 1 to 30.3; Bristol, 1 to 29.1; Plymouth, 1 to 29; Essex, 1 to 28.8; Worcester, 1 to 23.9; Berkshire, 1 to 22.7.

LENGTH OF MARRIED LIFE OF LIBELLANTS.

As an aid to the practical study of the causes leading to divorce, it will be of interest to briefly review the statistics, in regard to the number of years which the libellants have been married before seeking a judicial separation from the bonds of matrimony. It will be necessary, however, to confine this review to the record of the last four years, since previous to 1879 such returns were not made. Taking the whole period between 1879 and 1882 into consideration, it appears that an average of 35.2 per cent. of the petitioners had been married only between five and ten years, and 35 per cent. between ten and twenty years.

An aggregate of 417 libellants had been married from one to five years; 289 from twenty to thirty; 83 over thirty; 21 under one year; 16 under six months. Of the divorces prayed for on the ground of adultery, the largest proportion was after

a married life of between five and ten years, while for desertion the ratio was the highest between ten and twenty years.

As the statistics of each of these four years furnish very nearly similar results, it will be necessary to refer only to those of 1882, as an example of the others. In this year the average length of married life of the libellants was, for all causes, 10·95 years. For the cause of adultery, it was 9·86 years; for neglect to provide, 10·02; for intoxication, 10·70; for cruel and abusive treatment, 10·85; for desertion, 11·41; for extreme cruelty, 12·02; for imprisonment, 17·05. Thirty-six and one-tenth per cent. of the petitioners had been married from five to ten years; 35·9 per cent. from ten to twenty; 93 libellants between one and five; 72 between twenty and thirty; 15 over thirty; 6 under one year; 3 under six months. Of the total number of suits in which adultery was alleged as a cause, 36·8 per cent. were brought after a married life of from ten to twenty years; 34·2 per cent. from five to ten; in 29, marriage had continued between one and five years; in 8 between twenty and thirty; in 3 over thirty; in 2 under one year; in 2 under six months.

In the cases in which desertion was the alleged cause, 37·4 per cent. of the parties to the suit had been married from ten to twenty years; 36·5 per cent. from five to ten; 38 of them from twenty to thirty; 37 from one to five; 8 over thirty.

Of the suits brought within the first five years of married life for alleged adultery, 57·4 per cent. were upon the petition of the husband, and 42·4 per cent. upon that of the wife. On the contrary, of those prayed for after five years, 42 per cent. were sought by the former, and 58 per cent. by the latter. For alleged desertion, 32·3 per cent. of the libellants were males, and 67·7 per cent. females.

REMARKS ON DIVORCE.

After a careful consideration of the foregoing statistics, several evident facts stand out in startling prominence. That the number of divorces in Massachusetts is excessive, and that this number has increased very largely within the past twenty years, must be apparent to all who have studied the subject. It can, or rather should be no consolation to us, that this Common-

wealth is better off in this respect than its sister States of Vermont, Rhode Island and Connecticut,* even though a comparison between them was not misleading, on account of the difference in their laws authorizing divorce. The principle of *tu quoque* is a dangerous one upon which to rest in the presence of a growing social evil; and hence, instead of pointing to the records of other States as a flattering unction for our own shortcomings, it is incumbent upon us to seek the causes which operate in this State to produce such grave results, in order that remedies may be applied, if such become possible.

That divorce laws are wise, both in their conception and enactment, there can be but little doubt, although by certain earnest observers this statement has been denied. To oblige a woman, however,—and it has been shown that nearly seventy per cent. of the divorces in Massachusetts are granted to the wife—to submit to the brutalities of a cruel ~~or~~ drunken husband, or to his profligacy, without hope of relief; or to compel a husband to continue a contract in the face of the many marital wrongs, which the records show are committed by the wife, would certainly be a legal cruelty, particularly when by a judicial separation an opportunity may be offered for future happiness. While, however, laws having for their object a correction of unfortunate evils are necessary, care should always be taken that every legislative safeguard is placed around a marriage contract, in order to prevent a hasty or unjust abrogation of it. Whether the laws of this State have made a divorce too easy of attainment; whether, for instance, the enactment relating to the subsequent marriage of the guilty party is any improvement over that originally passed, which forbade such a marriage during the lifetime of the innocent party, is not a question to be discussed in a report of this nature. Of all the changes in the Divorce Acts, one at least deserves more than a passing notice; viz., that relating to desertion as a cause, which, in opening it to the deserting party, provides that it shall be only so granted, when it has been proved that the desertion

* The proportion for Massachusetts for twenty years is one divorce to thirty-three and one-half marriages, while in Vermont for the ten years preceding 1879 it was one to seventeen, in Rhode Island below one to fourteen, and in Connecticut below one to eleven. For 1880 the ratio in Vermont was one in twenty; in Rhode Island and Connecticut, for 1881, one to about ten and one-half, and one to sixteen and two-thirds respectively.

is on account of extreme cruelty on the part of the one deserted. This proviso prevents groundless desertion, which in some other States too often takes place with the sole object of marrying another. On the whole the divorce laws of this Commonwealth have kept pace with the improved understanding of the social condition of the people, and have been wisely framed to meet the many causes which exist in modern life to break up the domestic ties and relations.

As easy as it is to point to the great prevalence of the causes for which divorces are granted, it is much more difficult to explain the underlying evils which lead to them. Whatever these conditions may be, and however they may have been brought about, we must, strangely enough, look mainly to our native population for the explanation. For while it is certain that the older a community grows the more crime of all sorts becomes common, and one of their results, as seen in the records of the divorce courts, more frequently noticed, yet that our greatly increased foreign population cannot be held responsible is proved by the fact that the greater proportion of them belong to a Church, which forbids divorce from the bonds of matrimony. Various theories have been advanced by writers upon this subject to explain the great prevalence of divorce; but it seems most probable that the chief cause must be sought in the effect which modern civilization has in producing an individualism. A late observer has very truly said that family ties must have their foundation in social and domestic affections, guided by intellect and cultivated by moral sentiments. Whether modern life leads to this is a question which it concerns us to ponder well. The keynote to the answer seems to have been sounded in the lesson to be learned from the statistics of deaths from brain diseases, which have been given in another portion of this report. The great increase of one hundred and forty-four and nine-tenths per cent. in the mortality from these disorders during the past twenty-three years can have but one solution,—that there is a rapidly growing tendency to make the business of life one of paramount and absorbing importance, and to sacrifice domestic relations and home affections to the American Moloch of unrest and unceasing mental activity. This truth does not apply to the husband alone; the wife must assume some of the responsibility.

In fact, some writers have gone so far as to lay at her door many of the mistakes which tend to strain the ties, which should centralize the family within the home. This seems unjust, however, in view of the records. But that the wife, with the modern desire to have a mission, the fulfilment of which so often makes the domestic duties and the claims of matrimony irksome to her, does sometimes become too individualized for the preservation of the social affections, no one who has watched carefully the onward march of our nineteenth century ideas can fail to recognize. It is by no means intended to deprecate woman's advancement in any direction, but to call attention to the fact that there is a tendency in this advancement to subordinate the central affections, which in so many different ways make of the house a home, to a purely intellectual development. The intellect, both on the part of the husband and the wife, must guide, but not control these affections, if many of the causes which lead to divorce are to be averted.

Again, it is a serious question whether the present system of education does not tend to foster a growth which will eventually lead to individualism; or rather, perhaps, whether it does not neglect to cultivate ideas which will result in a centralism of home ties. Without entering into a discussion of this subject, as not coming within the scope of this review, it may be proper to suggest, that there seems to be a tendency on the part of the modern educators to develop the head at the expense of the heart, and to confine the course of study within such a limit, that a broad expansion of mind becomes almost an impossibility.

The opposite extremes of luxury and poverty — and by the latter is meant not squalor, but the lack of means — conditions of society which become more marked as communities grow older, must be considered important factors in the production of this great social evil. Both tend to the same individualism — the former by its too often mistaking the external semblance of domestic life for its true realization, the shadow for the reality; and the latter, by the sacrifice which is so frequently made in the struggle for existence. Self-absorption, whether in the pursuit of wealth, of pleasure, or of the bare means of living; the anxieties and cares which modern civilization largely aug-

ments, have a tendency to prevent inter-communication, and to alienate the affections. Let these domestic errors, without mutual confidence and mutual concessions, gain a foothold, and married happiness becomes a wreck, from which it is but a step to desertion and the divorce courts.

A still further failure in the social condition of this country, and the remark applies equally as well to Massachusetts, is to be found in the lack of simple, healthy amusements for the masses, which amusements have a tendency to afford a much-needed relief from care, and serve to elevate the social condition by counteracting the narrowing influences of constant work. This fact is nowhere more apparent than in the country districts, in which a life, monotonous from the lack of social recreation and enjoyment, often seeks relief in the many causes which lead to divorce.

That the domestic ills which result in legal separation are progressive, is abundantly proved by the tables showing the length of married life of the libellants. It has been seen that the largest number of suits are brought after a married life of between five and twenty years, while the average length of this life in 1882 was ten and ninety-five one-hundredths years. Hence conviction is forced upon us that the causes, which affect marital happiness, are generally slow in their action and development, and that the domestic ties are strained for a long time before they are finally broken.

If the existing evils have been correctly indicated in the preceding paragraphs, what are the proper remedies for them? This is one of the most difficult of the social problems to solve; since it can find its elucidation only in a radical change in many of the usages of modern life. Legislative enactments can accomplish nothing in this direction, beyond protecting society, and the evils themselves can only suggest their own cures. It must be left to educators, to social scientists, to the church, and by no means last to parents, to apply the relief. Cultivate the domestic affections in the young, by making home attractive, no matter how humble it may be; provide amusements and instruction for the masses on all days of the week, particularly on Sunday, which is too often their only holiday; multiply coffee-houses and places for cheerful recreation, to check the spread of intemperance; encourage the promotion

of social clubs and the like in rural communities; in short, stamp out as far as possible the growing tendency to a selfish individualism, and the number of divorces will undoubtedly decrease in the future; cultivate and foster this individualism, and the existing evil, as great as it has become, will assuredly increase to still greater proportions.

Causes not specified,†	585	21	45	58	9	79	17	47	17	91	19	24	78	80

* Totals : manner not stated.

† Comprising 102 deaths from "Hemorrhage," 50 from "Tumor," 23 from "Inflammation," and 410 deaths either returned as "Unknown," or of which no cause was stated in the Returns.

NOTE. — When a person is "found drowned," the case is classed under "accident or negligence." (V. — 1. 4.) Cases of death from cold, heat, drinking cold water, lightning, surgical operations, and exposure, are classed under "accident or negligence." (V. — 1. 6.) As "stricture of the urethra" is almost invariably the result of gonorrhoea, it is classed as (I. — 2. 2). — [Dr. FARR.]

NOTE.

Previously to the adoption, in the Registration Report of 1855, of the present NOSOLOGICAL ARRANGEMENT of Tables IX. and X., the term "Infantile" in those Tables included under a single designation not only all deaths returned under the several heads "Infantile," "Premature," or "Premature Births," but also all ascribed to "Debility" or "Unknown" causes, if under two years of age.

This plan was continued until the Registration Report of 1868, in which, to secure greater accuracy, the method now employed was adopted, by which Deaths returned under the head of "Premature," "Premature Births," or "Infantile," are stated *separately* in Table VIII., and *combined* in Tables IX. and X. Deaths of children under two years, from "Debility" or "Unknown" cause, are no longer classed as "Infantile."

See Registration Report of 1868, p. cv, for a fuller explanation.

TABLE X. — CAUSES OF DEATH. — COMPARATIVE MORTALITY.

Exhibiting the Number of Deaths from Specified Causes (Nosologically Arranged) during each of the Five Years 1878-79-80-81-82, with the Number of Deaths, annually, to 100,000 of the Population; also the Number and Percentage of Deaths during the Five Years 1878-82, and during the entire Registration Period of Forty-one Years and Eight Months, ending Dec. 31, 1882.*

[Still-births included.]

[Public Statutes — Chapter 32.]

OF THE REGISTRY AND RETURN OF BIRTHS, MARRIAGES AND DEATHS.

SECTION 1. The clerk of each city and town shall receive or obtain, and record and index, the following facts concerning the births, marriages and deaths therein, separately numbering and recording the same in the order in which he receives them, designating in separate columns as follows: —

In the record of births, the date of birth, the place of birth, the name of the child, (if it has any,) the sex and color of the child, the names and the places of birth of the parents, the occupation of the father, the residence of the parents, and the date of the record;

In the record of marriages, the date of the marriage, the place of marriage, the name, residence, and official station of the person by whom married, the names and the places of birth of the parties, the residence of each, the age and color of each, the condition of each, (whether single or widowed,) the occupation, the names of the parents, and the date of the record.

In the record of deaths, the date of the death, the name of the deceased, the sex, the color, the condition, (whether single, widowed, or married,) the age, the residence, the occupation, the place of death, the place of birth, the names and places of birth of the parents, the disease or cause of death, the place of burial, and the date of the record.

SECT. 2. Parents shall give notice to the clerk of their city or town of the births and deaths of their children: every householder shall give like notice of every birth and death happening in his house; the eldest person next of kin shall give such notice of the death of his kindred; the keeper of a workhouse, house of correction, prison, hospital, or almshouse, except the state almshouse, and the master or other commanding officer of a ship, shall give like notice of every birth and death happening among the persons under his charge. Whoever neglects to give such notice for the space of six months after a birth or death shall forfeit a sum not exceeding five dollars.

SECT. 3. A physician who has attended a person during his last illness shall, when requested within fifteen days after the decease of

such person, forthwith furnish for registration a certificate of the duration of the last sickness, the disease of which the person died, and the date of his decease, as nearly as he can state the same. If a physician refuses or neglects to make such certificate, he shall forfeit ten dollars to the use of the town in which he resides.

SECT. 4. Every sexton, undertaker, or other person having charge of a burial-ground, and every undertaker or superintendent of burials having charge of the funeral rites preliminary to the interment of a human body, shall forthwith obtain and return to the clerk of the city or town in which the deceased resided, or the death occurred, the facts required by this chapter to be recorded by said officer concerning the deceased, and the person making such return shall receive from his city or town the fee of twenty-five cents therefor.

SECT. 5. No human body shall be buried or removed from any city or town until a proper certificate has been given by the clerk or registrar to the undertaker, sexton, or other person performing the burial or removing the body. Such certificate shall state that the facts required by this chapter have been returned and recorded; and no clerk or registrar shall give such certificate or burial permit until the certificate of the cause of death has been obtained from the physician, if any, in attendance at the last sickness of the deceased, and placed in the hands of said clerk or registrar; and in cities and towns where there are boards of health, the certificate of the cause of death shall also be approved by such board before a permit to bury is given by the registrar or clerk. Upon application, the chairman of the board of health, or any physician employed by any city or town for such purpose, shall sign the certificate of the cause of death to the best of his knowledge and belief, if there has been no physician in attendance. He shall also sign such certificate, upon application, in case of death by dangerous contagious disease, or in any other event when the certificate of the attending physician cannot for good and sufficient reasons be early enough obtained. In case of death by violence, the medical examiner attending shall furnish the requisite medical certificate. Any person violating the provisions of this section shall be punished by fine not exceeding twenty-five dollars.

SECT. 6. The boards of health of towns and the mayor and aldermen of cities shall, on or before the first day of July in each year, license a suitable number of undertakers to take charge of the funeral rites preliminary to the interment of a human body.

SECT. 7. Physicians and midwives shall on or before the fifth day of each month report to the clerk of each city and town, except Boston, a correct list of all children born therein during the month next preceding at the birth of which they were present, stating the place and date of each birth, and the parents' names.

SECT. 8. The clerk of each city and town shall give public notice that he is prepared to furnish, to all physicians and midwives applying therefor, blanks for returns under the preceding section.

SECT. 9. Any physician or midwife neglecting to report such list for ten days after it is due shall for each offence forfeit a sum not exceeding twenty dollars.

SECT. 10. The clerk of each city and town shall annually, on or before the first day of March, transmit to the secretary of the common-

wealth certified copies of the records of the births, marriages, and deaths which have occurred therein during the year ending on the last day of the preceding December.

SECT. 11. The record of the town clerk relative to a birth, marriage, or death, shall be *prima facie* evidence, in legal proceedings, of the facts recorded. A certificate, signed by the town clerk for the time being, shall be admissible as evidence of such record.

SECT. 12. The clerk of each city and town, (except in such cities and towns as choose a registrar, in which cases the provisions of this section shall apply to the registrar.) for receiving or obtaining, recording, indexing, and returning the facts relating to marriages, births, and deaths occurring therein, shall be entitled to receive from the city or town for each marriage, fifteen cents; for each birth, fifty cents; for each death returned to him by the persons specified in sections two, three, and four, twenty cents for each of the first twenty entries, and ten cents for each subsequent entry; for each death not so returned, but by him obtained and recorded, thirty-five cents, as the same shall be certified by the secretary of the commonwealth; but a city or town containing more than ten thousand inhabitants may limit the aggregate compensation allowed to their clerk or registrar. He shall forfeit not less than twenty nor more than one hundred dollars for each refusal or neglect to perform any duty required of him by sections one, two, three, four, ten, twelve, fourteen, sixteen, and eighteen.

SECT. 13. The superintendent of the state almshouse shall obtain, record, and make return of the facts in relation to the births and deaths which occur in his institution, in like manner as is required of town clerks. The clerk of a town in which such almshouse is located shall, in relation to the births and deaths of persons in said almshouse, be exempt from the duties otherwise required of him by this chapter.

SECT. 14. The secretary shall at the expense of the commonwealth prepare and furnish to the clerks of the several cities and towns, and to the superintendent of the state almshouse, blank books of suitable quality and size to be used as books of record under this chapter, blank books for indexes thereto, and blank forms for returns, on paper of uniform size; and shall accompany the same with such instructions and explanations as may be necessary and useful. City and town clerks shall make such distribution of blank forms of returns furnished by the secretary as he shall direct.

SECT. 15. The secretary shall cause the returns received by him for each year to be bound together in one or more volumes with indexes thereto. He shall prepare from the returns such tabular results as will render them of practical utility, make report thereof annually to the general court, and do all other acts necessary to carry into effect the provisions of this chapter.

SECT. 16. A city or town containing more than ten thousand inhabitants may choose a person other than the clerk to be registrar, who shall be sworn, and to whom all the provisions of this chapter concerning clerks shall apply. The returns and notices required to be made and given to clerks shall be made and given to such registrar under like penalties.

SECT. 17. The secretary of the commonwealth shall prosecute, by

an action of tort in the name of the commonwealth, for the recovery of any penalty or forfeiture imposed by sections two, three, twelve, sixteen, and eighteen.

SECT. 18. A city or town may make rules and regulations to enforce the provisions of this chapter, or to secure a more perfect registration of births, marriages, and deaths therein.

[Public Statutes — Chapter 145.]

OF MARRIAGE.

CERTAIN MARRIAGES PROHIBITED.

SECTION 1. No man shall marry his mother, grandmother, daughter, granddaughter, step-mother, sister, grandfather's wife, son's wife, grandson's wife, wife's mother, wife's grandmother, wife's daughter, wife's granddaughter, brother's daughter, sister's daughter, father's sister, or mother's sister.

SECT. 2. No woman shall marry her father, grandfather, son, grandson, step-father, brother, grandmother's husband, daughter's husband, granddaughter's husband, husband's father, husband's grandfather, husband's son, husband's grandson, brother's son, sister's son, father's brother, or mother's brother.

SECT. 3. In all cases in which the relationship mentioned in the two preceding sections is founded on marriage, the prohibition shall continue notwithstanding the dissolution by death or divorce of the marriage on which such relationship is founded, unless the divorce is for a cause which shows such marriage to have been originally unlawful or void.

SECT. 4. All marriages contracted while either of the parties has a former wife or husband living, except as is provided in chapter one hundred and forty-six, shall be void.

SECT. 5. No insane person or idiot shall be capable of contracting marriage.

SECT. 6. No magistrate or minister shall solemnize a marriage, when he has reasonable cause to suppose the male to be under the age of twenty-one years or the female to be under the age of eighteen years, except with the consent of the parent or guardian having the custody of the minor, if there is any such parent or guardian in the commonwealth competent to act.

SECT. 7. Every marriage, solemnized within this commonwealth, which is prohibited on account of consanguinity or affinity between the parties, or on account of either of them having a former wife or husband living, or when either party was insane or an idiot, shall be void without a decree of divorce or other legal process.

SECT. 8. Every marriage solemnized when either party was under the age of consent shall be similarly void, if the parties separate during such nonage, and do not afterwards cohabit.

SECT. 9. The validity of a marriage shall not be questioned in the

trial of a collateral issue on account of the insanity or idiocy of either party, but such question shall only be raised in a process instituted to test such validity in the lifetime of both parties.

SECT. 10. When persons resident in this commonwealth, in order to evade any of the provisions of the first five sections of this chapter, and with an intention of returning to reside in this commonwealth, go into another state or country and there have their marriage solemnized, and afterwards return and reside here, the marriage shall be deemed void in this commonwealth.

SECT. 11. When the validity of a marriage is doubted, either party may file a libel for annulling such marriage, or, when the validity of a marriage is denied or doubted by either party, the other party may file a libel for affirming the same. Such libel shall be filed in the same manner as a libel for divorce, and all the provisions of chapter one hundred and forty-six relative to libels for divorce, and section twenty-four of said chapter relative to the powers of the court in relation thereto, shall, so far as applicable, apply to libels under this section. Upon proof of the nullity or validity of the marriage, it shall be declared void or affirmed by a decree of the court, and such decree of nullity may be made notwithstanding the marriage was solemnized out of the commonwealth, if the libellant had his domicile in the commonwealth when the marriage was solemnized and also when the libel was filed, and such decree affirming a marriage shall be conclusive upon all persons concerned.

LEGITIMACY, CARE, ETC., OF ISSUE OF VOID MARRIAGES.

SECT. 12. The issue of a marriage declared void on account of consanguinity or affinity between the parties shall be deemed to be illegitimate.

SECT. 13. The issue of a marriage declared void on account of the nonage, insanity, or idiocy of either party shall be deemed to be the legitimate issue of the parent who was capable of contracting the marriage.

SECT. 14. When a marriage is declared void on account of a prior marriage of either party, and it appears that the second marriage was contracted in good faith and with the full belief of the parties that the former husband or wife was dead, that fact shall be stated in the decree, and the issue of the second marriage, born or begotten before the commencement of the suit, shall be deemed to be the legitimate issue of the parent capable of contracting the marriage.

SECT. 15. Upon or after a decree of nullity the court shall have similar power to make orders concerning the care, custody, and maintenance of the minor children of the parties as upon a decree of divorce.

NOTICE OF INTENTION OF MARRIAGE.

SECT. 16. Persons intending to be joined in marriage in this commonwealth shall before their marriage cause notice of their intention to be entered in the office of the clerk or registrar of the city or town in which they respectively dwell, or, if they do not dwell within the

commonwealth, in the office of the clerk or registrar of the city or town in which they propose to have the marriage solemnized. If there is no such clerk or registrar in the place of their residence, the entry shall be made in an adjoining city or town.

SECT. 17. The clerk or registrar shall deliver to the parties a certificate under his hand, specifying the time when notice of the intention of marriage was entered with him, together with all facts in relation to the marriage which are required by law to be ascertained and recorded, except those respecting the person by whom the marriage is to be solemnized. Such certificate shall be delivered to the minister or magistrate before whom the marriage is to be contracted, before he proceeds to solemnize the same.

SECT. 18. If a clerk or registrar issues such certificate to a male under the age of twenty-one years, or to a female under the age of eighteen years, when he has reasonable cause to suppose the person to be under such age, except upon the application or consent in writing of the parent, master, or guardian of such person, he shall forfeit a sum not exceeding one hundred dollars; but if there is no parent, master, or guardian in this commonwealth competent to act, a certificate may be issued without such application or consent.

SECT. 19. The clerk or registrar may require of any person applying for such certificate an affidavit setting forth the age of the parties; which affidavit shall be sworn to before a justice of the peace, and shall be sufficient proof of age to authorize the issuing of the certificate.

SECT. 20. Whoever, when applying for such a certificate, wilfully makes a false statement in relation to the age, residence, parent, master, or guardian of either of the parties intending marriage, shall forfeit a sum not exceeding two hundred dollars.

SECT. 21. When a marriage is solemnized in another state between parties living in this commonwealth, and they return to dwell here, they shall within seven days after their return file with the clerk or registrar of the city or town where either of them lived at the time a certificate or declaration of their marriage, including the facts concerning marriages required by law; and for every neglect so to do they shall forfeit ten dollars.

BY WHOM AND HOW MARRIAGE MAY BE SOLEMNIZED.

SECT. 22. A marriage may be solemnized by a justice of the peace or by a minister of the gospel, ordained according to the usage of his denomination, who resides in the commonwealth and continues to perform the functions of his office; but every marriage shall be solemnized in the city or town in which the person solemnizing it resides, or in which one or both of the persons to be married reside.

SECT. 23. A marriage among the people called Friends or Quakers may be solemnized in the manner heretofore used and practised in their societies.

SECT. 24. Every justice of the peace, minister, and clerk or keeper of the records of a meeting wherein marriages among Friends or Quakers are solemnized shall make a record of each marriage solemnized before him, or in such meeting, and of all facts relating to the marriage which are required by law to be recorded. He shall

also, between the first and tenth days of each month, return a copy of all such records for the month next preceding to the clerk or registrar of the city or town in which the marriage was solemnized, and shall, when one or both of the parties to the marriage resided in a city or town other than that in which the marriage was solemnized, return a copy of the record of such marriage to the clerk or registrar of the city or town in which either party resided, and to the clerks or registrars of both cities or towns when the parties resided in different places. All marriages so returned shall be recorded by the clerk or registrar, and every person neglecting to make the returns required by this section shall forfeit for each neglect not less than twenty nor more than one hundred dollars.

SECT. 25. A justice of the peace or minister who joins persons in marriage contrary to the provisions of this chapter, knowing that the marriage is not duly authorized, shall forfeit not less than fifty nor more than one hundred dollars.

SECT. 26. Whoever undertakes to join persons in marriage, knowing that he is not authorized so to do, shall be imprisoned in the jail for a term not exceeding six months, or pay a fine of not less than fifty nor more than two hundred dollars.

SECT. 27. No marriage solemnized before a person professing to be a justice of the peace or a minister of the gospel, or solemnized in the society of Friends according to the usages of said society, shall be deemed or adjudged to be void, nor shall the validity thereof be in any way affected by want of jurisdiction or authority in such person or society, or by an omission or by informality in the manner of entering the intention of marriage, if the marriage is in other respects lawful, and is consummated with a full belief on the part of the persons so married, or of either of them, that they have been lawfully joined in marriage.

SECT. 28. Marriages solemnized in a foreign country by a consul or diplomatic agent of the United States shall be valid in this commonwealth.

EVIDENCE OF MARRIAGE.

SECT. 29. The record of a marriage, made and kept as prescribed by law by the person before whom the marriage has been solemnized, or by the clerk or registrar of a city or town, or a copy of such record duly certified, shall be received in all courts and places as presumptive evidence of such marriage.

SECT. 30. When a marriage has been solemnized by a consul or diplomatic agent of the United States, a copy of the record or a certificate from such consul or agent shall be presumptive evidence of such marriage.

SECT. 31. When the fact of marriage is required or offered to be proved before a court, evidence of the admission of such fact by the party against whom the process is instituted, or evidence of general repute or of cohabitation as married persons, or any other circumstantial or presumptive evidence from which the fact may be inferred, shall be competent.

[Public Statutes, Chapter 199.]

SECT. 17. For lawfully solemnizing and certifying a marriage, a minister or justice of the peace shall be entitled to receive one dollar and twenty-five cents.

[St. 1883, Chapter 158.]

AN ACT IN RELATION TO THE RETURNS OF BIRTHS BY PHYSICIANS AND MIDWIVES.

Be it enacted, etc., as follows:

SECTION 1. Section seven of chapter thirty-two of the Public Statutes is amended so as to read as follows: "Section 7. Physicians and midwives shall, on or before the fifth day of each month, report to the clerk of each city or town, except Boston, a correct list of all children, born therein during the month next preceding, at whose birth they were present, stating the date and place of each birth, the name of the child (if it has any), the sex and color of the child, the name, place of birth and residence of the parents, and the occupation of the father. The fee of the physician or midwife shall be twenty-five cents for each birth so reported, and shall be paid by the city or town in which the report is made."

SECT. 2. This act shall take effect upon its passage. [*Approved May 3, 1883.*]

LAWS CONCERNING DIVORCE.

[Public Statutes, Chapter 146.]

CAUSES FOR DIVORCE.

SECTION 1. A divorce from the bond of matrimony may be decreed for adultery, impotency, extreme cruelty, utter desertion continued for three consecutive years next prior to the filing of the libel, gross and confirmed habits of intoxication, cruel and abusive treatment, or, on the libel of the wife, when the husband, being of sufficient ability, grossly or wantonly and cruelly refuses or neglects to provide suitable maintenance for her.

SECT. 2. Such divorce may also be decreed when either party has separated from the other without his or her consent and has united with a religious sect or society that professes to believe the relation of husband and wife void or unlawful, and has continued united with such sect or society for three years, refusing during that term to cohabit with the other party; or when either party has been sentenced to confinement at hard labor for life or for five years or more in the state prison or in a jail or house of correction; and after a divorce for such cause, no pardon granted to the party so sentenced shall restore such party to his or her conjugal rights.

SECT. 3. When a divorce from bed and board under laws heretofore in force or a divorce nisi has been decreed and the parties have lived separately for three consecutive years next after the decree, a divorce from the bonds of matrimony may be decreed upon the petition of the party in whose favor the previous decree was granted; and when the parties have lived separately for five consecutive years next after such decree, a divorce from the bond of matrimony may be decreed in favor of either party.

SECT. 4. Except as provided in the following section, no divorce shall be decreed if the parties have never lived together as husband and wife in the commonwealth; nor shall a divorce be decreed for a cause occurring in another state or country, unless, before such cause occurred, the parties had lived together as husband and wife in the commonwealth, and one of them lived in the commonwealth at the time when the cause occurred.

SECT. 5. When the libellant has resided in the commonwealth for five years next preceding the filing of the libel, or, if the parties were inhabitants of the commonwealth at the time of their marriage, when the libellant has been such an inhabitant for three years next preceding such filing, a divorce may be decreed for any cause allowed by law, whether it occurred in the commonwealth or elsewhere, unless it appears that the libellant has removed into the commonwealth for the purpose of obtaining a divorce.

LIBELS FOR DIVORCE.

SECT. 6. Libels for divorce shall be heard and determined in the supreme judicial court held for a county in which one of the parties lives, except that, when the libellant has left the county in which the parties have lived together, the adverse party still living therein, the libel shall be heard and determined in the court held for that county.

SECT. 7. Every such libel shall be signed by the libellant, if of sound mind and of legal age to consent to marriage; otherwise it may be signed by the guardian of the libellant or by a person admitted by the court to prosecute the libel as his or her next friend.

SECT. 8. The libel may be presented to the supreme judicial court or to a justice thereof in any county, in term time or vacation, or it may be filed in the office of the clerk of said court in vacation.

SECT. 9. The court, justice, or clerk may order the adverse party to be summoned to appear and answer at the court having jurisdiction of the cause, by the publication of the libel or of the substance thereof, with the order thereon, in one or more newspapers to be designated in the order, or by delivering to such party an attested copy of the libel and a summons, or in such other manner as may seem most proper and effectual; but when such order is made by a clerk, the court or any justice thereof may order such additional notice to be given as may seem proper.

* * * * *

SECT. 18. The court before which a libel for divorce is pending may, without entering a decree of divorce, cause the libel to be continued upon the docket from time to time, and during such continuance may make such orders and decrees concerning a temporary

separation of the parties, the separate maintenance of the wife, and the custody and support of minor children, as in its judgment the interests of the parties and the necessities of the case demand, and such orders and decrees may be changed or annulled as the court may determine, and any orders or decrees of said court under this section shall, while they are in force, supersede any order or decree of the probate court under section thirty-three of chapter one hundred and forty-seven, and may suspend the right of said court to act under said section.

SECT. 19.* All decrees of divorce shall in the first instance be decrees nisi, to become absolute after the expiration of six months from the entry thereof, on application of either party to the clerk of the court, and on such application the clerk shall enter a final decree, unless the court has for sufficient cause, on application of any party interested, otherwise ordered.

SECT. 20. No libel for divorce on the ground of desertion shall be defeated by a temporary return or other act done by the party deserting, if it appears that such return or other act was not made or done in good faith, but with the intent to defeat the obtaining of a divorce by the other party.

RESUMPTION OF FORMER NAME BY WIFE.

SECT. 21. The court upon granting a divorce to a woman may allow her to resume her maiden name or the name of any former husband.

RIGHT TO MARRY AGAIN.

SECT 22. After a divorce from the bond of matrimony either party may marry again as if the other were dead, except that the party against whom the divorce was granted shall not marry within two years from the time of the entry of the final decree of divorce.

* * * * *

FOREIGN DIVORCES.

SECT. 41. A divorce decreed in another state or country according to the laws thereof, and by a court having jurisdiction of the cause and of both the parties, shall be valid and effectual in this commonwealth; but when an inhabitant of this commonwealth goes into another state or country to obtain a divorce for a cause which occurred here while the parties resided here, or for a cause which would not authorize a divorce by the laws of this commonwealth, a divorce so obtained shall be of no force or effect in this commonwealth.

CRIMINAL PROVISIONS.

SECT. 42. If persons divorced from the bond of matrimony cohabit as husband or wife or live together in the same house, they shall be deemed to be guilty of adultery.

* * * * *

* Amended by chapter 223 on opposite page.

[St. 1882, Chapter 194.]

AN ACT CONCERNING STATISTICS OF DIVORCE.

Be it enacted, etc., as follows:

SECTION 1. The clerks of courts for the several counties, and of the supreme judicial court for the county of Suffolk, shall, annually, during the month of February, make returns to the secretary of the Commonwealth in relation to libels for divorce in their respective counties for the calendar year next preceding. Such returns shall specify the following details: the number of libels pending at the beginning of the year; the number of libels filed within the year; the number of divorces granted; the number of divorces refused; the number of libels contested; the number of libels uncontested; the alleged cause for divorce in each case; the sex of the libellant and the length of time the parties have been married; and the number of cases in which notice has been given to the district-attorney for prosecution under section forty-four of chapter one hundred and forty-six of the Public Statutes, and the criminal offence for which divorce has been granted in such cases.

SECT. 2. The secretary shall furnish the said clerks of courts with suitable blank forms for the returns provided for in the preceding section.

SECT. 3. The secretary shall annually prepare from said returns full and complete abstracts and tabular statements of the facts relating to divorces for each county, and embody such abstracts and statements, with necessary analyses, in the annual reports to the legislature relating to the registry of births, deaths and marriages.

SECT. 4. The first return to be made under this act shall include the details specified in section one, so far as practicable, for the years eighteen hundred and seventy-nine, eighteen hundred and eighty, eighteen hundred and eighty-one, and eighteen hundred and eighty-two.

SECT. 5. This act shall take effect upon its passage. [*Approved May 1, 1882.*]

[St. 1882, Chapter 223.]

AN ACT RELATING TO THE MAKING AND ENTERING OF DECREES OF DIVORCE.

Be it enacted, etc., as follows:

SECTION 1. Section nineteen of chapter one hundred and forty-six of the Public Statutes is amended so as to read as follows: "Section 19. All decrees of divorce shall in the first instance be decrees *nisi*, to become absolute after the expiration of six months from the entry thereof, without further notice thereof by publication or otherwise, on application of either party to the court, or any justice thereof, in term time or vacation; and on such application the court or justice shall make a final decree, unless the court has for sufficient cause, on application of any party interested, otherwise ordered."

SECT. 2. This act shall take effect upon its passage. [*Approved May 15, 1882.*]

STATISTICAL NOSOLOGY.

ADOPTED FOR REGISTRATION IN MASSACHUSETTS.

The following plan of a Nomenclature and Classification of Diseases does not essentially differ from that authorized by the Registrar-General of England to be used in the preparation of the "Weekly Return of Births and Deaths in London," and is also, with slight modifications, identical with that embodied in a report drawn up by William Farr, Esq., M.D., of London, for the consideration of the International Statistical Congress which met at Paris in September, 1855; which report was printed in the Appendix to the Sixteenth Registration Report of the Registrar-General, England.

[NOTE. — This page and those that follow contain two lists of causes of death. The first — that on the left side — may be called the *TABULAR LIST*, and comprises all the heads which it is proposed to admit into the complete tables (IX. and X.), and under which ALL deaths, from whatever cause, are finally distributed. It represents those diseases which, under the same terms, or terms strictly synonymous with them, are found in practice to occur most frequently.

The *SUPPLEMENTAL LIST* is *subordinate* to the first, and contains the principal *special* diseases which it may be considered desirable to note. The figures in this list indicate the corresponding numbers of the tabular list under which such diseases are ultimately arranged.

Table VIII. includes both the Tabular and Supplemental lists; Tables IX. and X. the Tabular list only.]

CAUSES OF DEATH.

TABULAR LIST.

CLASS I. — ZYMOTIC DISEASES.

ORDER 1. — *Miasmatic*.

- I. 1. — 1. Small-pox
2. Measles
3. Scarlatina
4. Diphtheria
5. Cerebro-spinal Meningitis
6. Quinsy
7. Croup
8. Whooping Cough
- 9 Typhoid (and Infantile Fever)
10. Erysipelas
11. Metria (Puerperal Fever)
12. Carbuncle
13. Influenza
14. Dysentery
15. Diarrhœa
16. Cholera Infantum
17. Cholera
18. Ague
19. Remittent Fever
20. Rheumatism

SUPPLEMENTAL LIST.

*Of Diseases of Special Character
(or Synonymes.)*

- I. 1. — 1. Vaccination not stated.
Small-pox (second attack).
After vaccination.
Erysipelas, &c., after vaccination.
Chicken-pox
Miliaria.
3. Angina maligna.
5. "Spotted fever."
6. Mumps.
Tonsillitis.
- 9 Typhus fever
10. Pyemia.
Hospital gangrene.
Erythema.
11. Childbed fever.
12. Anthrax.
18. Intermittent fever
19. Yellow fever.
20. Rheumatism, with pericarditis, or disease of heart.

CAUSES OF DEATH.

TABULAR LIST.

SUPPLEMENTAL LIST.

ORDER 2. — *Enthetic.*

- I. 2. — 1. Syphilis
 2. Stricture of Urethra
 3. Hydrophobia
 4. Glanders
 5. Malignant Pustule
 6. Septicæmia

- I. 2. — 1. Gonorrhœa.
 Purulent ophthalmia.
 6. Necrosis (usually from
 dissection wounds).

ORDER 3. — *Dietic.*

- I. 3. — 1. Privation
 2. Purpura and Scurvy
 3. Delirium Tremens, } (Alcoholism)
 4. Intemperance, }

- I. 3. — 1. Want of breast milk.
 2. Rickets.
 Bronchoecle.

ORDER 4. — *Parasitic.*

- I. 4. — 1. Thrush
 2. Worms, &c.

- I. 4 — 2. Porrigo.
 Scabies.
 Tape worm.
 Hydatids.
 Trichiniasis.

CLASS II. — CONSTITUTIONAL DISEASES.

ORDER 1. — *Diathetic.*

- II. 1. — 1. Gout
 2. Dropsy
 3. Anæmia
 4. Cancer
 5. Noma (Canker)
 6. Mortification

- II. 1. — 3. Leucocythæmia
 4. Soft cancer.
 Epithelioma.
 Sweeps' cancer.
 Melanosis
 Other kinds of cancer.
 Polypus (part not stated).
 Lupus.
 6. Bed-sore.
 Dry gangrene.

ORDER 2. — *Tubercular.*

- II. 2. — 1. Scrofula
 2. Tabes Mesenterica
 3. Phthisis (Consumption of Lungs)
 4. Hydrocephalus

- II. 2. — 1. Psoas (Lumbar) abscess.
 White swelling.
 Cretinism (Goitre).
 Adenitis, Cellulitis.
 2. Tubercular peritonitis.
 3. Hæmoptysis.
 4. Tubercular meningitis.

CLASS III. — LOCAL DISEASES.

ORDER 1. — *Nervous System.*

- III. 1. — 1. Cephalitis
 2. Apoplexy
 3. Paralysis
 4. Insanity
 5. Chorea
 6. Epilepsy
 7. Tetanus
 8. Convulsions
 9. *Brain Diseases,* &c.*

- III. 1. — 1. Phrenitis. Myelitis.
 4. Monomania
 Fright.
 Grief.
 Melancholia.
 Rage.
 6. Hysteria.
 8. Laryngismus stridulus.
 9. Neuralgia.
 Ophthalmia.
 Otitis.
 Dis. of spinal nerve.
 Necrencephalus (Ramol-
 lissement).

* Other diseases of the brain, or diseases of the nervous system, *not otherwise distinguished*, are referred to this head. *Mutatis mutandis*, the note applies to the corresponding heads in other orders of this class.

ORDER 5. — <i>Execution.</i>	
V. 5. — 1. Hanging	
Sudden, cause unascertained	

NOTE. — Cases of "infantile fever" are classed with typhoid, relapsing, and other continued fevers, under one name, "typhoid fever;" of "rheumatic fever," with "rheumatism;" of "hemorrhage," and "abscess," with the diseases of the part affected (if that is stated, as it should always be, in the return). As "stricture of the urethra" is almost invariably the result of gonorrhœa, it is classed as I. 2. — 2. All cases of death returned "unknown," or of which the cause is not stated, and cases of "tumor," "inflammation," or "hemorrhage," of which the locality or part affected is not mentioned, are classed as unknown, and therefore not included in the foregoing table of specified causes.

* Manner stated.

† Manner not stated; return therefore imperfect.
